QuickPhone — Context Diagram (physical)

The whole system as one process and the five external entities it serves; flows match the Level 0 diagram

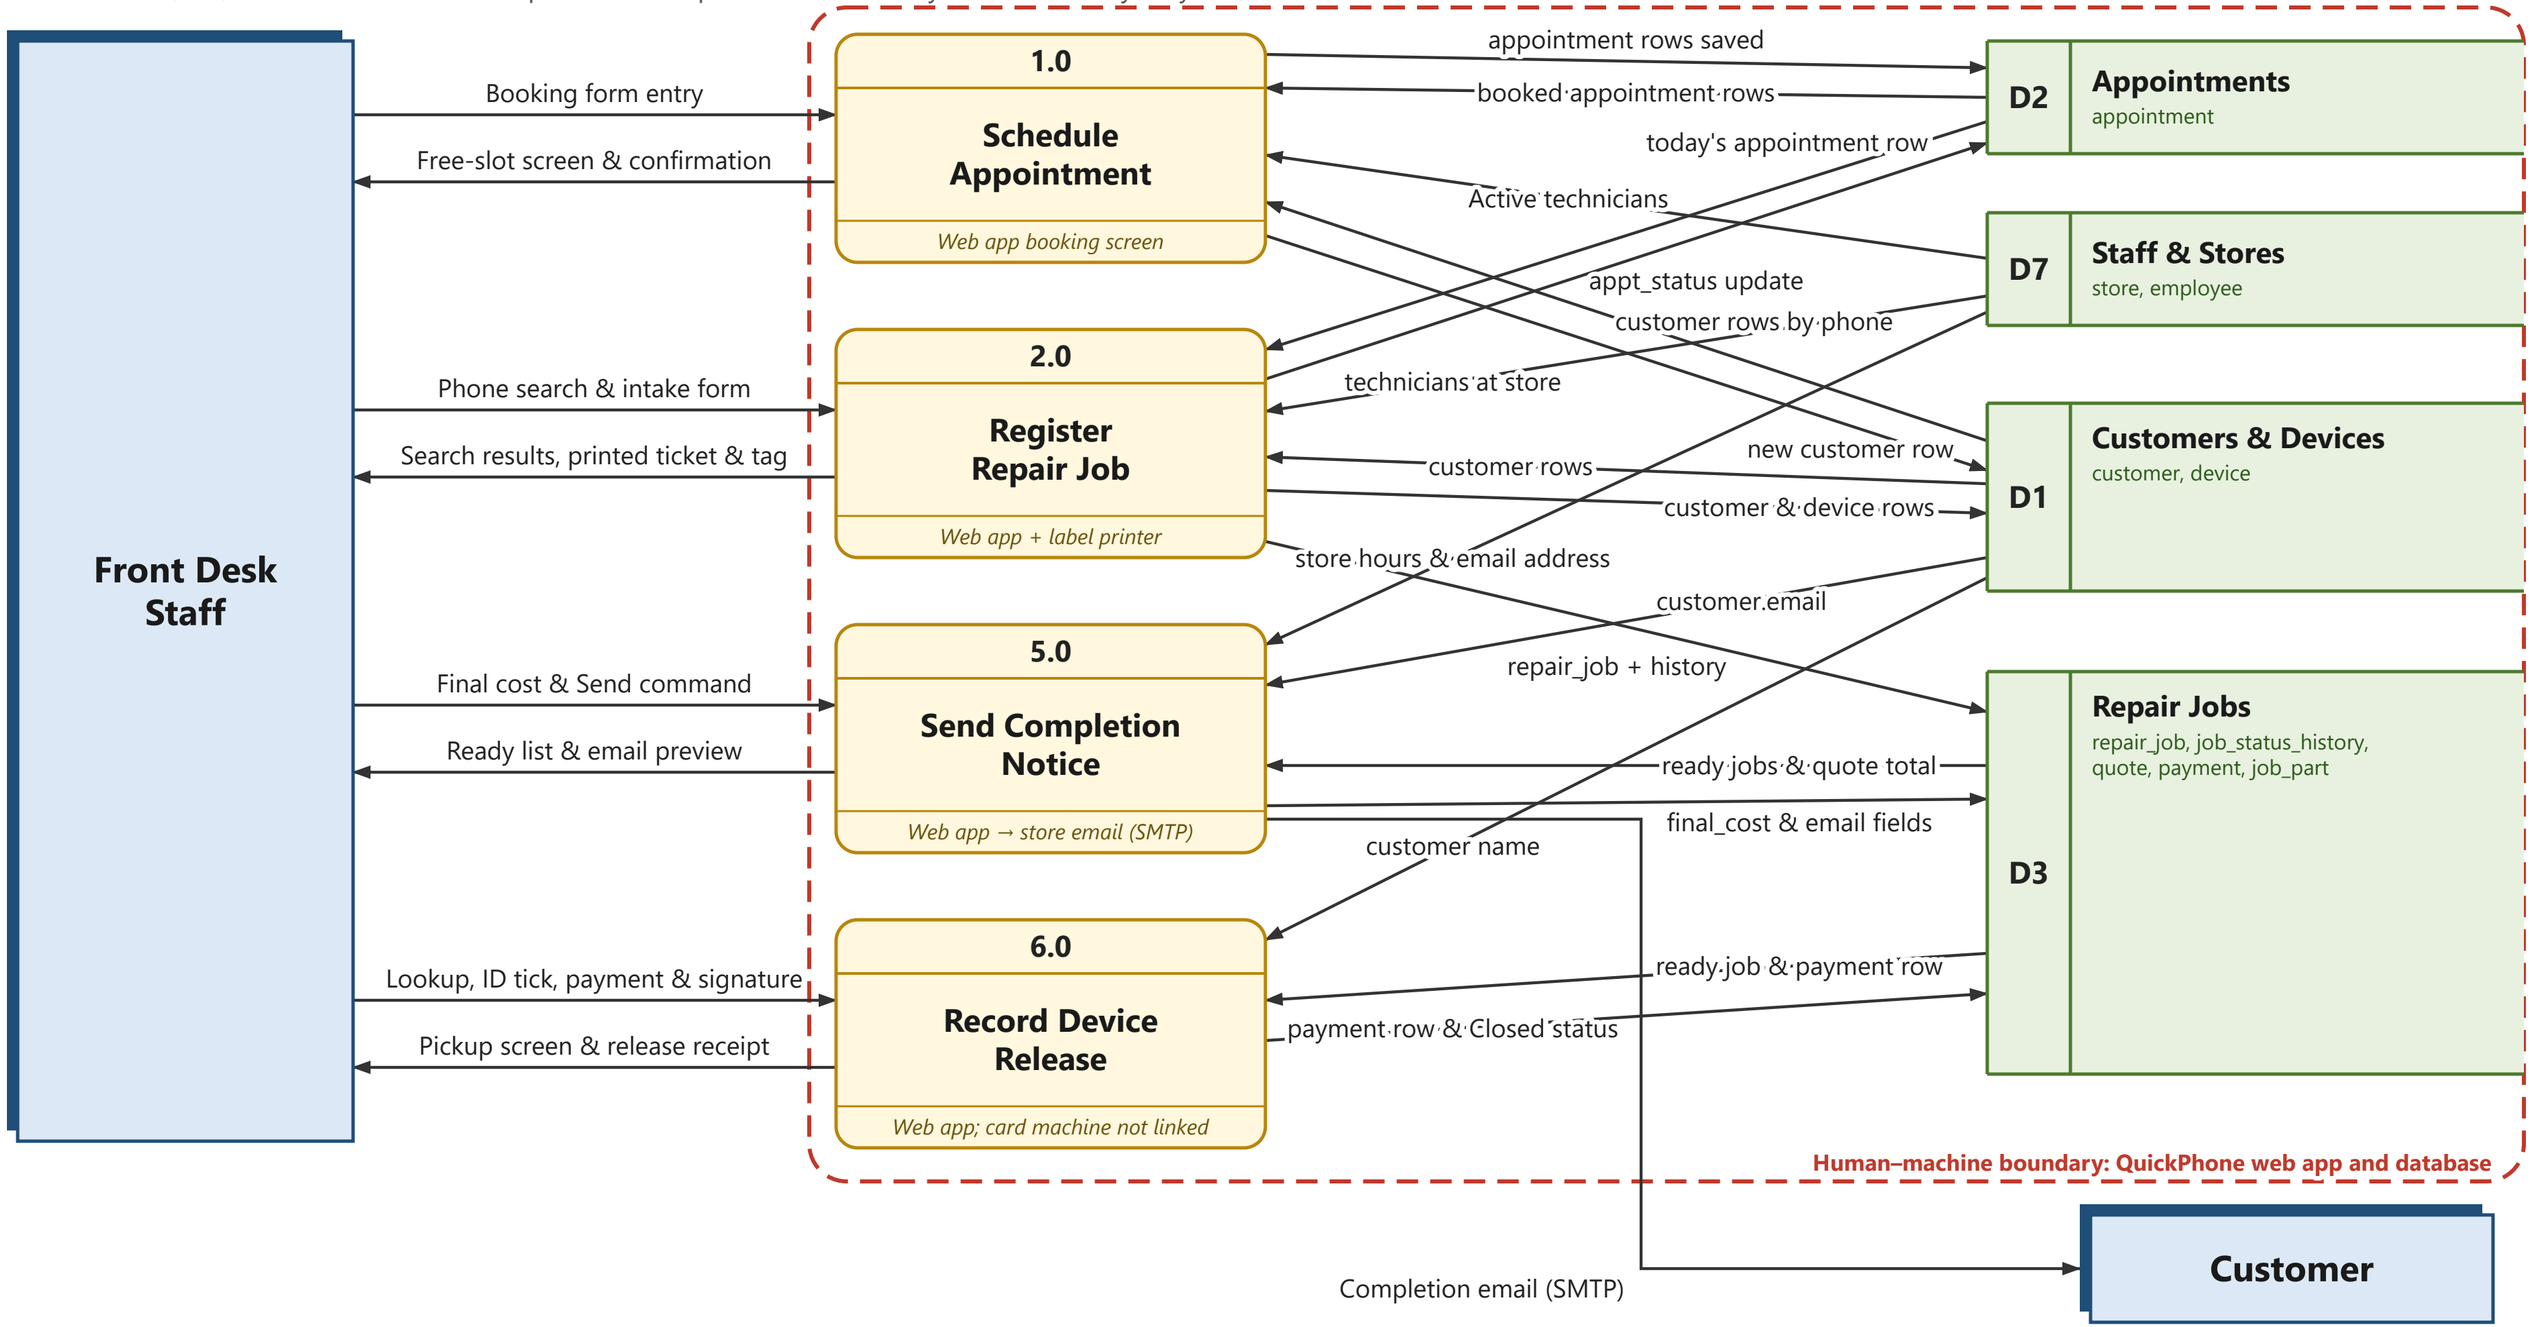

QuickPhone — Level 0 DFD (complete) (physical)

All nine processes, seven data stores and five external entities, each drawn once. For slides, use the three Level 0 parts.

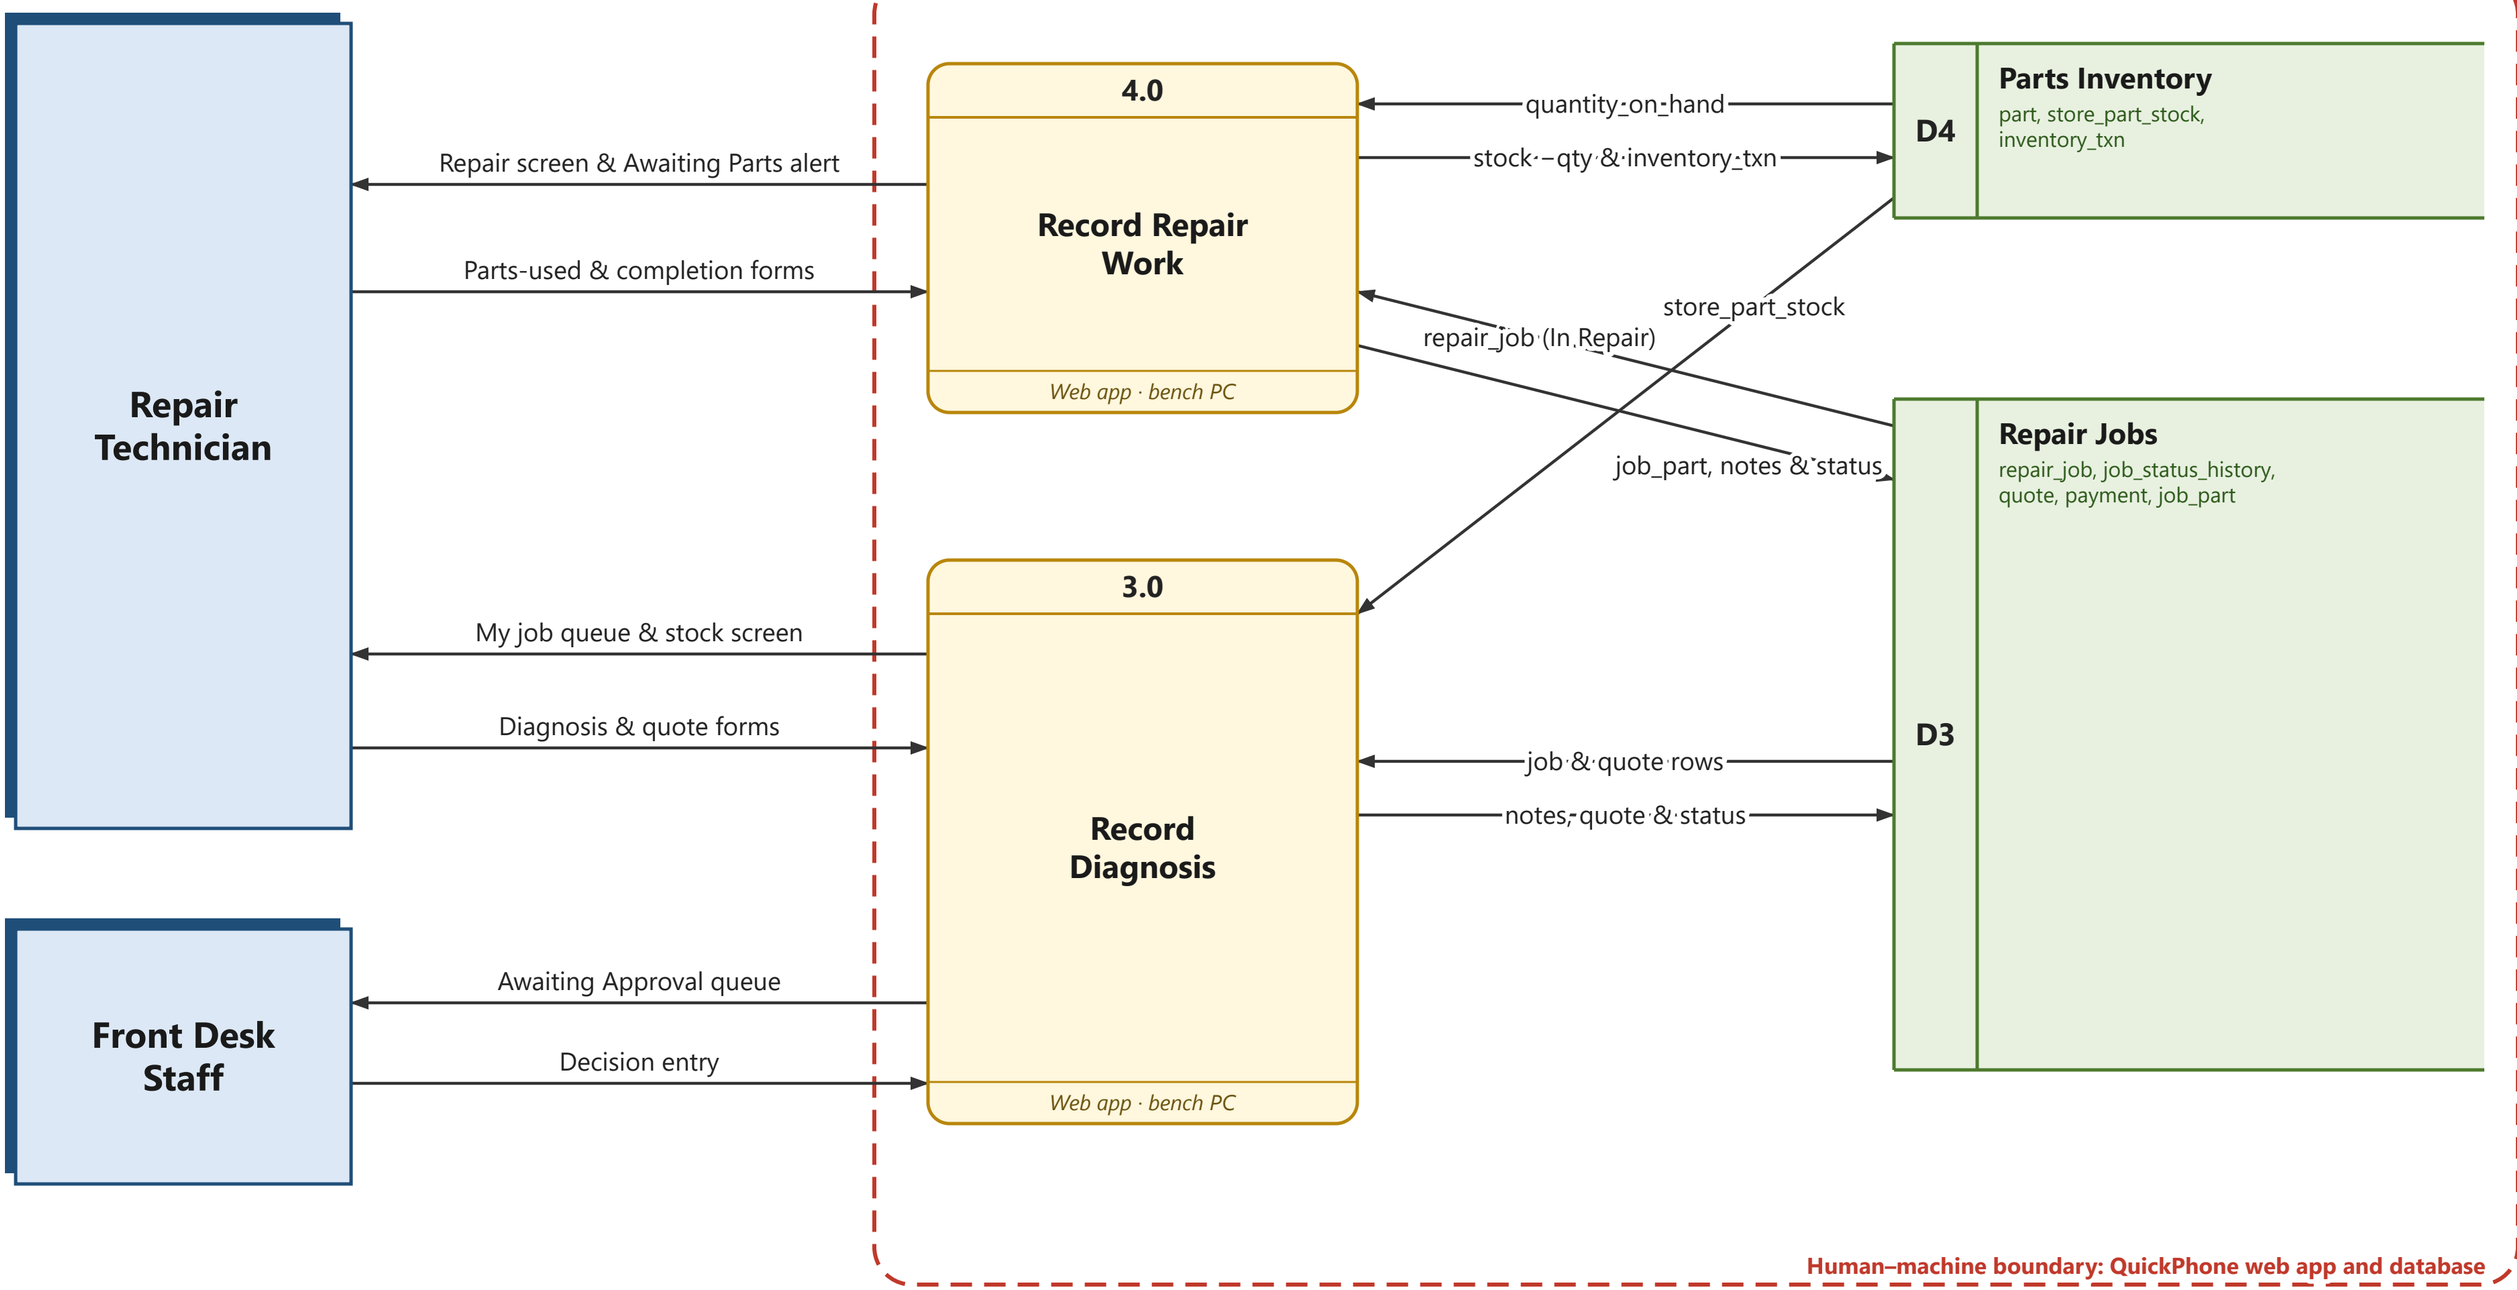

QuickPhone — Level 0 DFD (1 of 3): front counter (physical)

Processes 1.0, 2.0, 5.0 and 6.0. Each Level 0 part shows its processes with every store and entity they use, each drawn once.

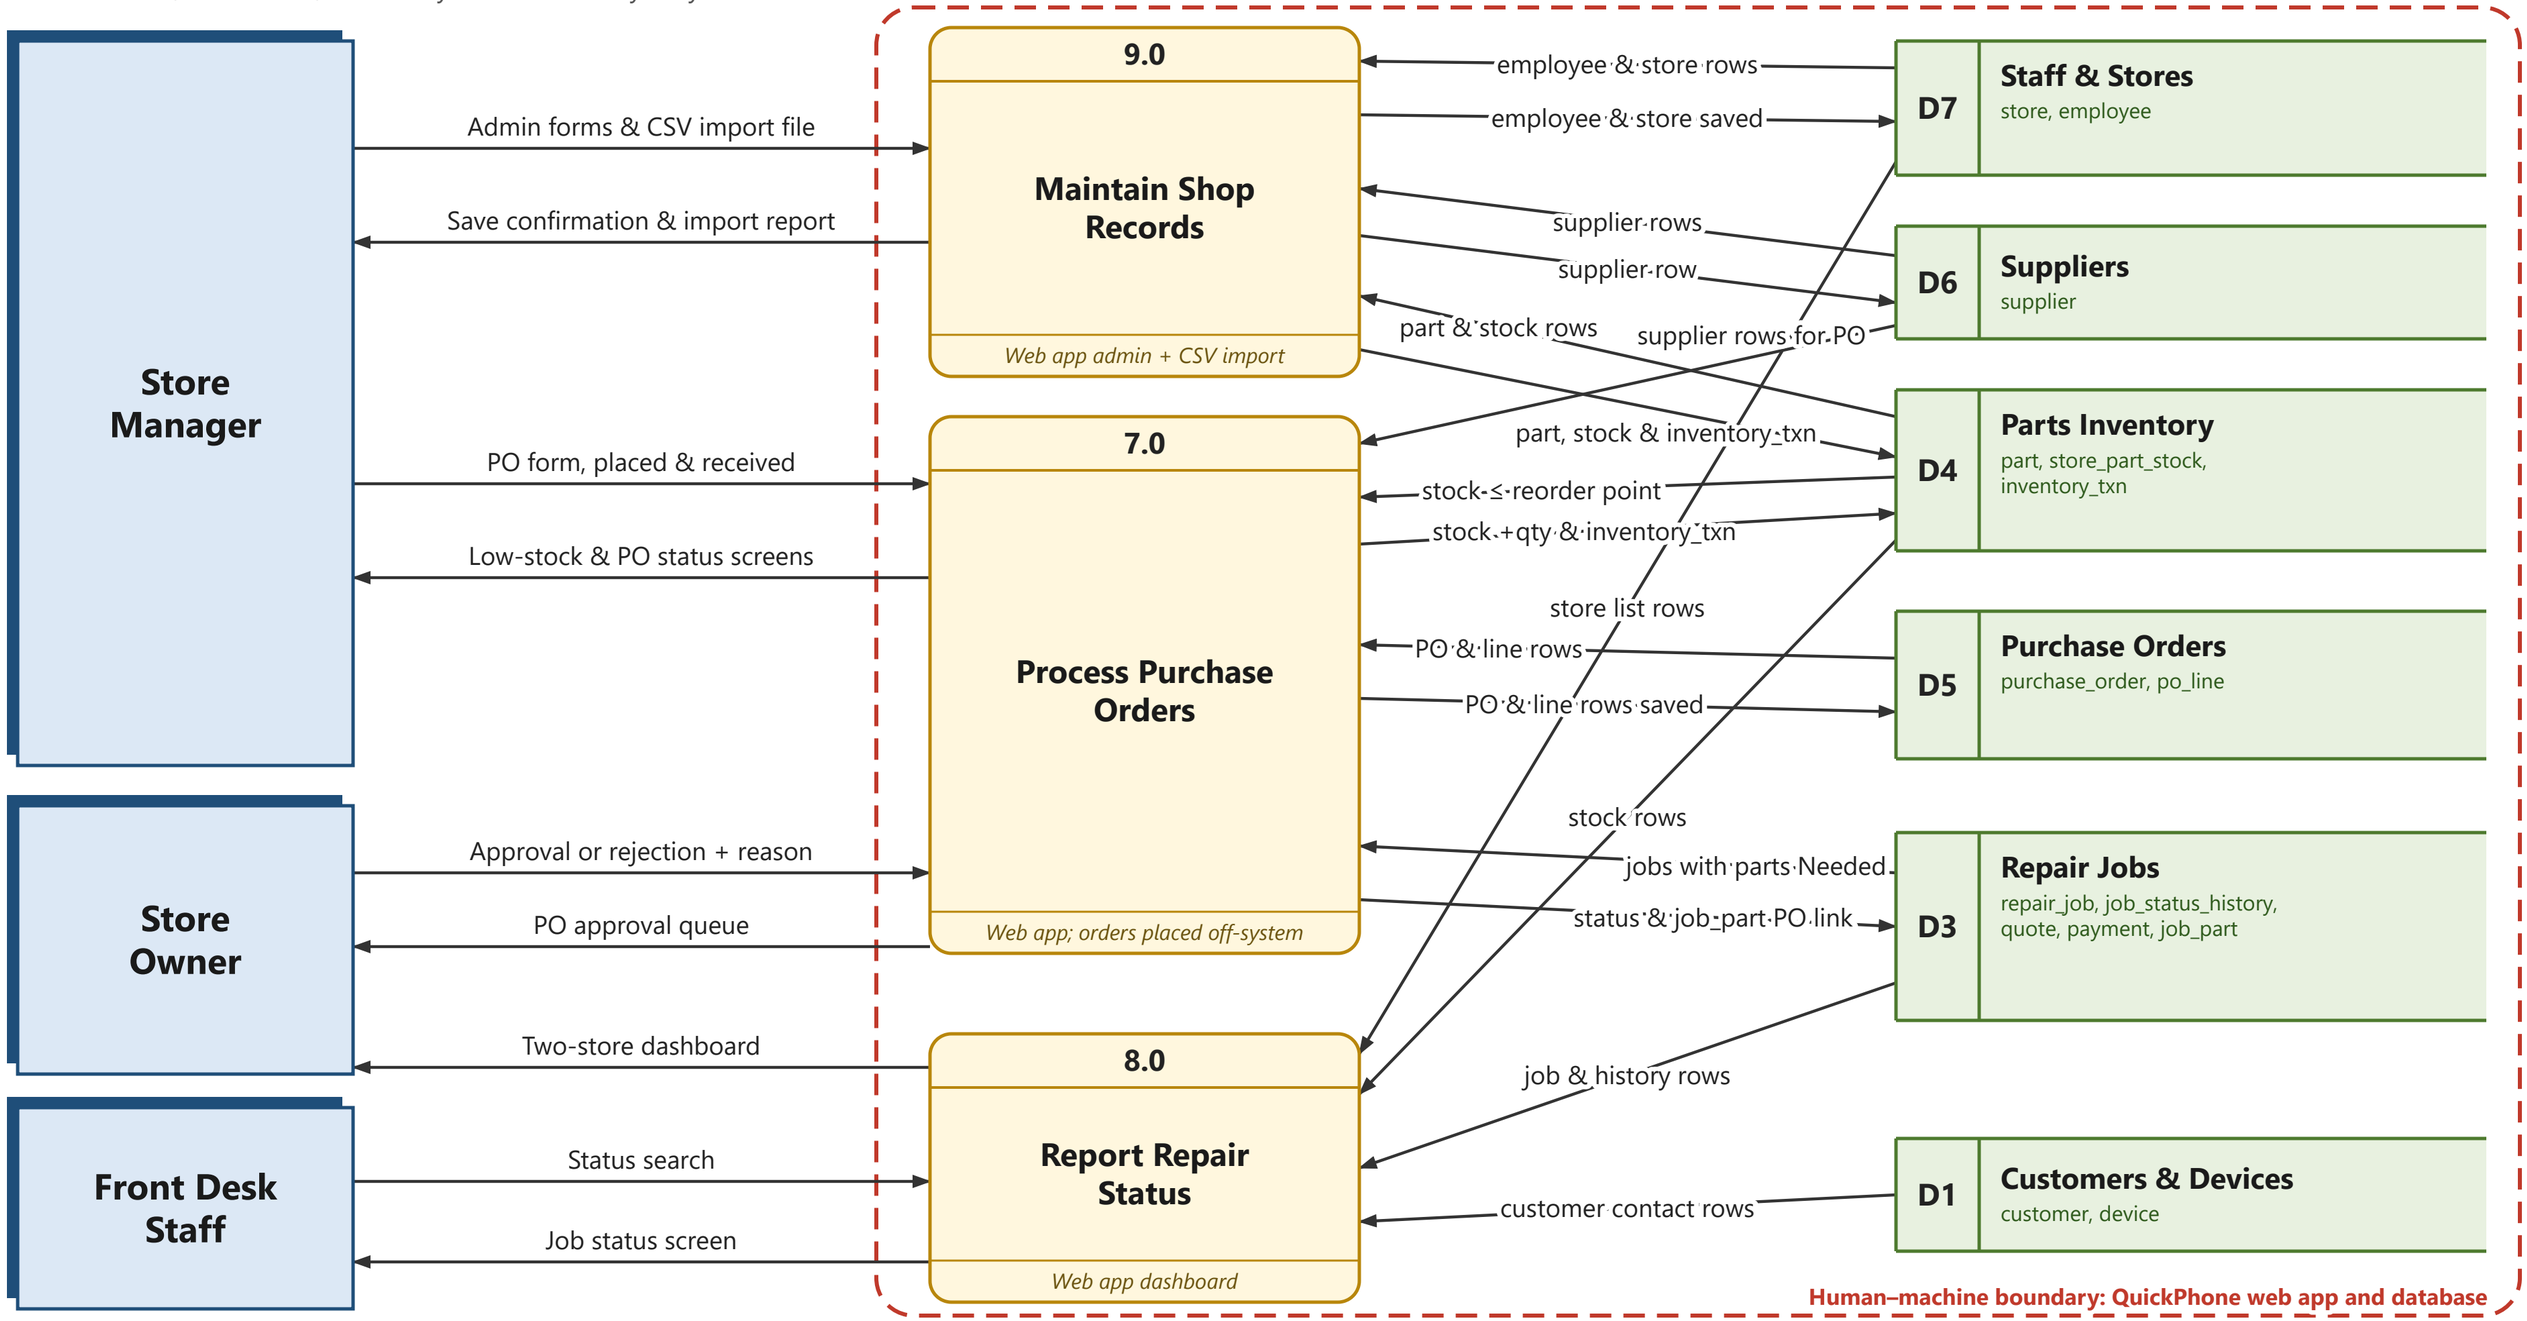

QuickPhone — Level 0 DFD (2 of 3): repair bench (physical)

Processes 3.0 and 4.0, with every store and entity they use.

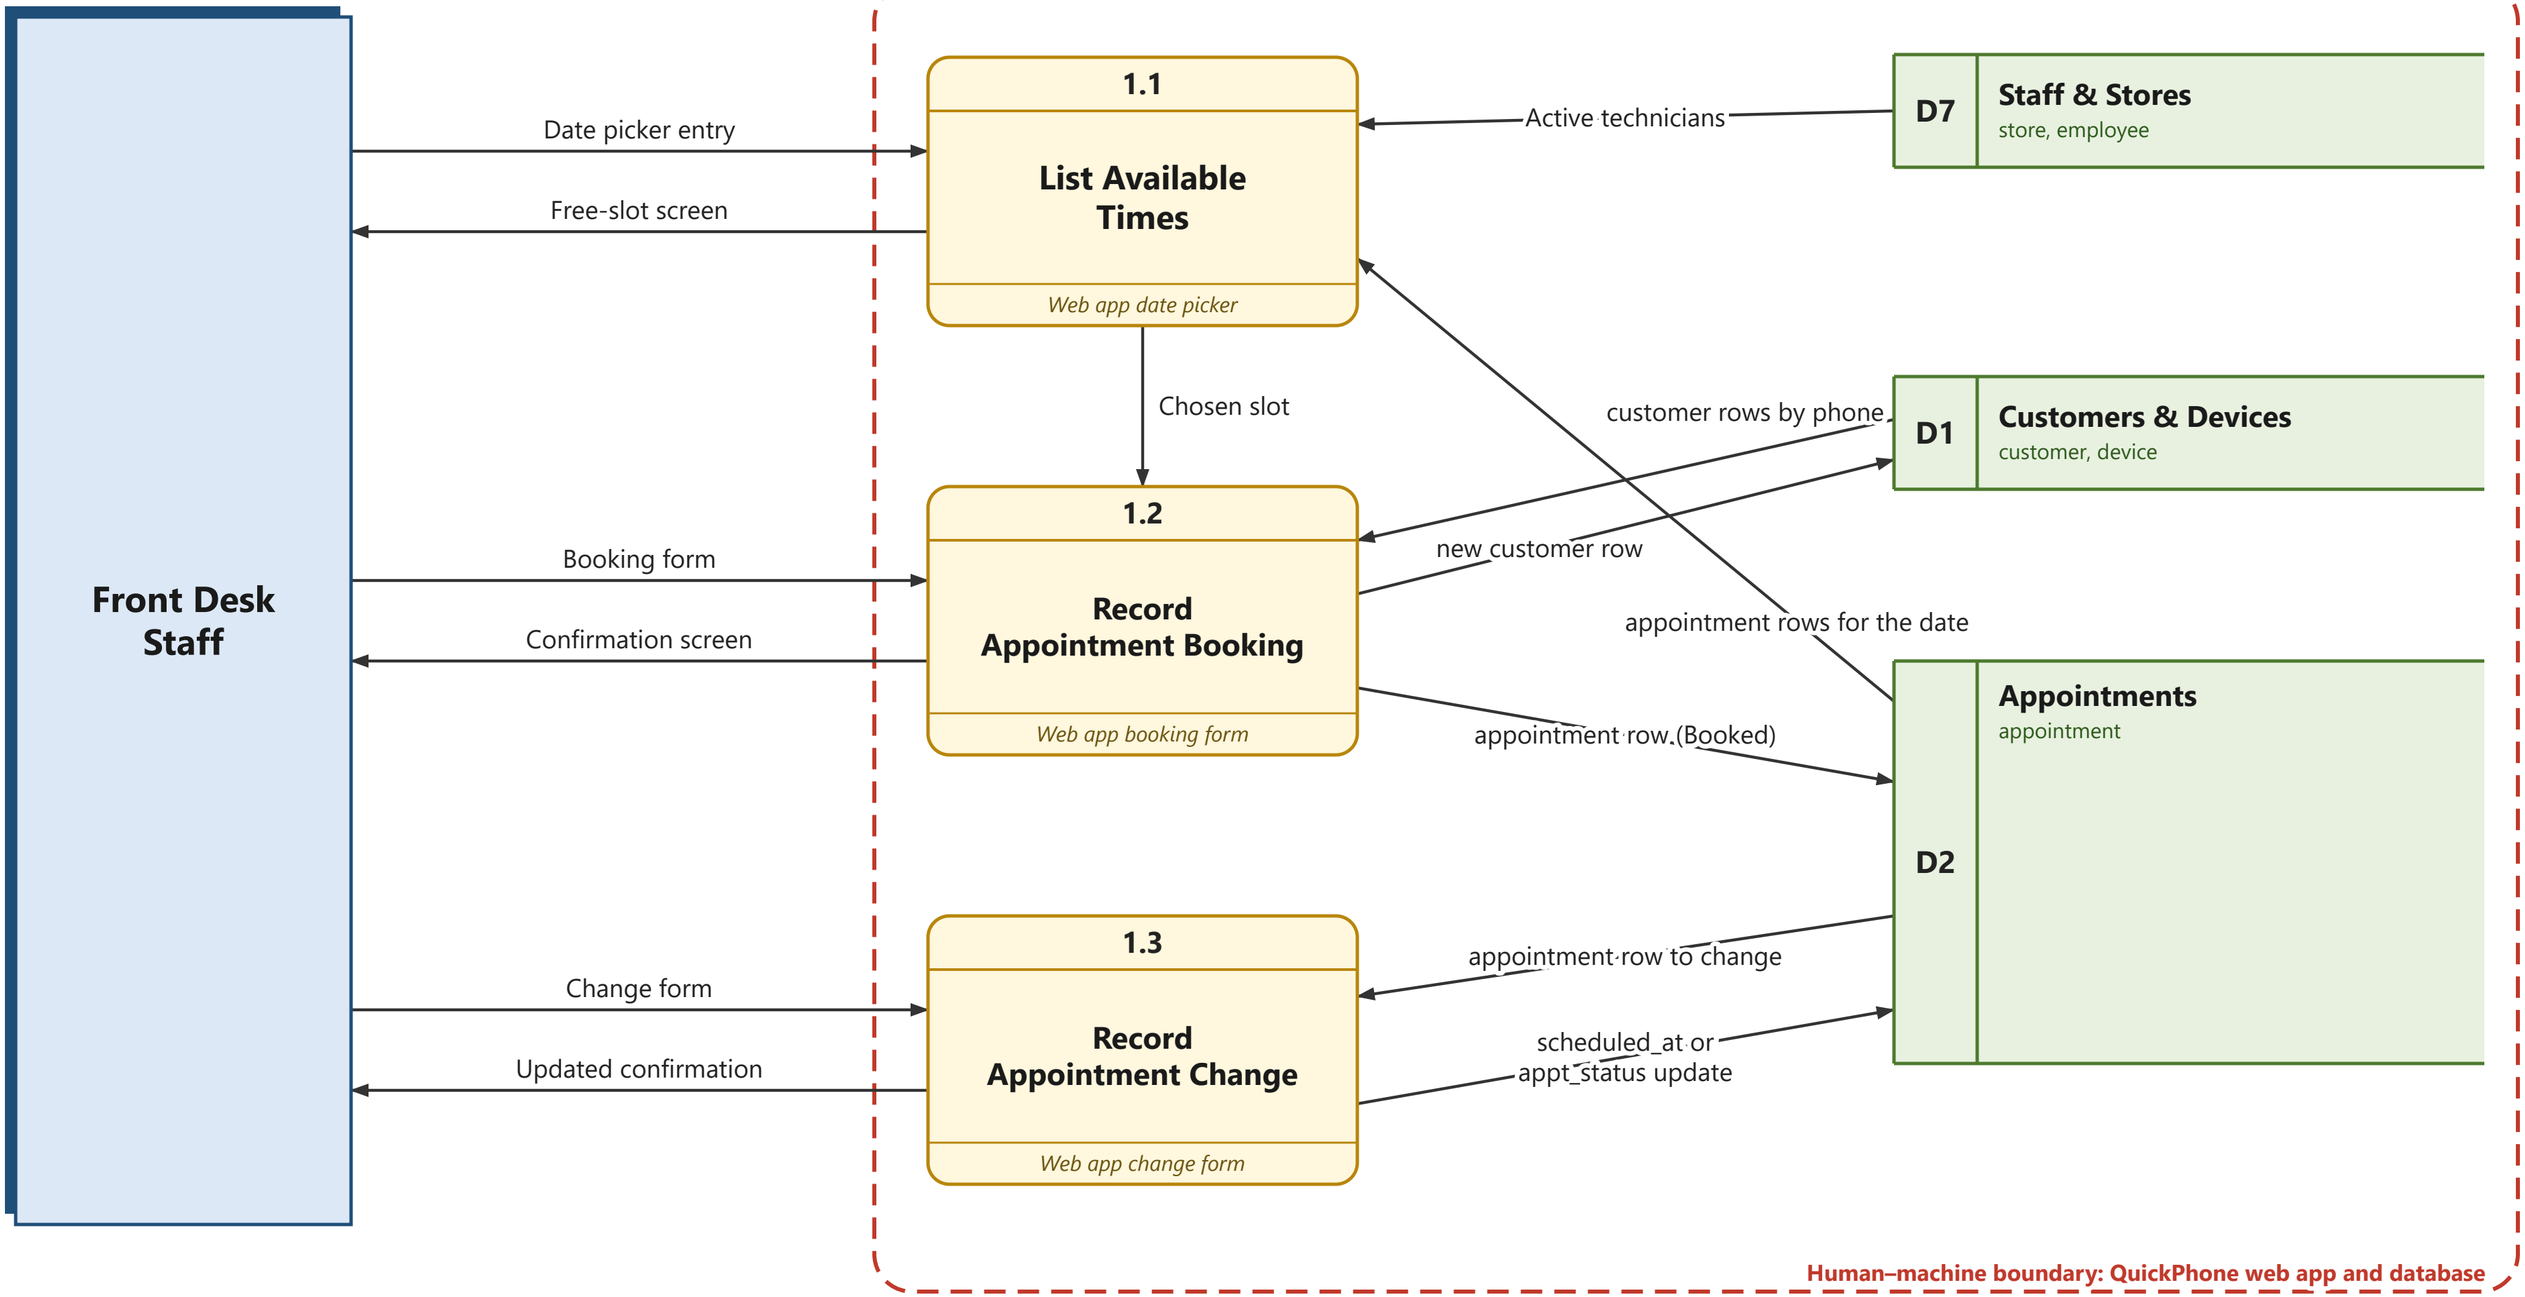

QuickPhone — Level 0 DFD (3 of 3): back office and reporting (physical)

Processes 7.0, 8.0 and 9.0, with every store and entity they use.

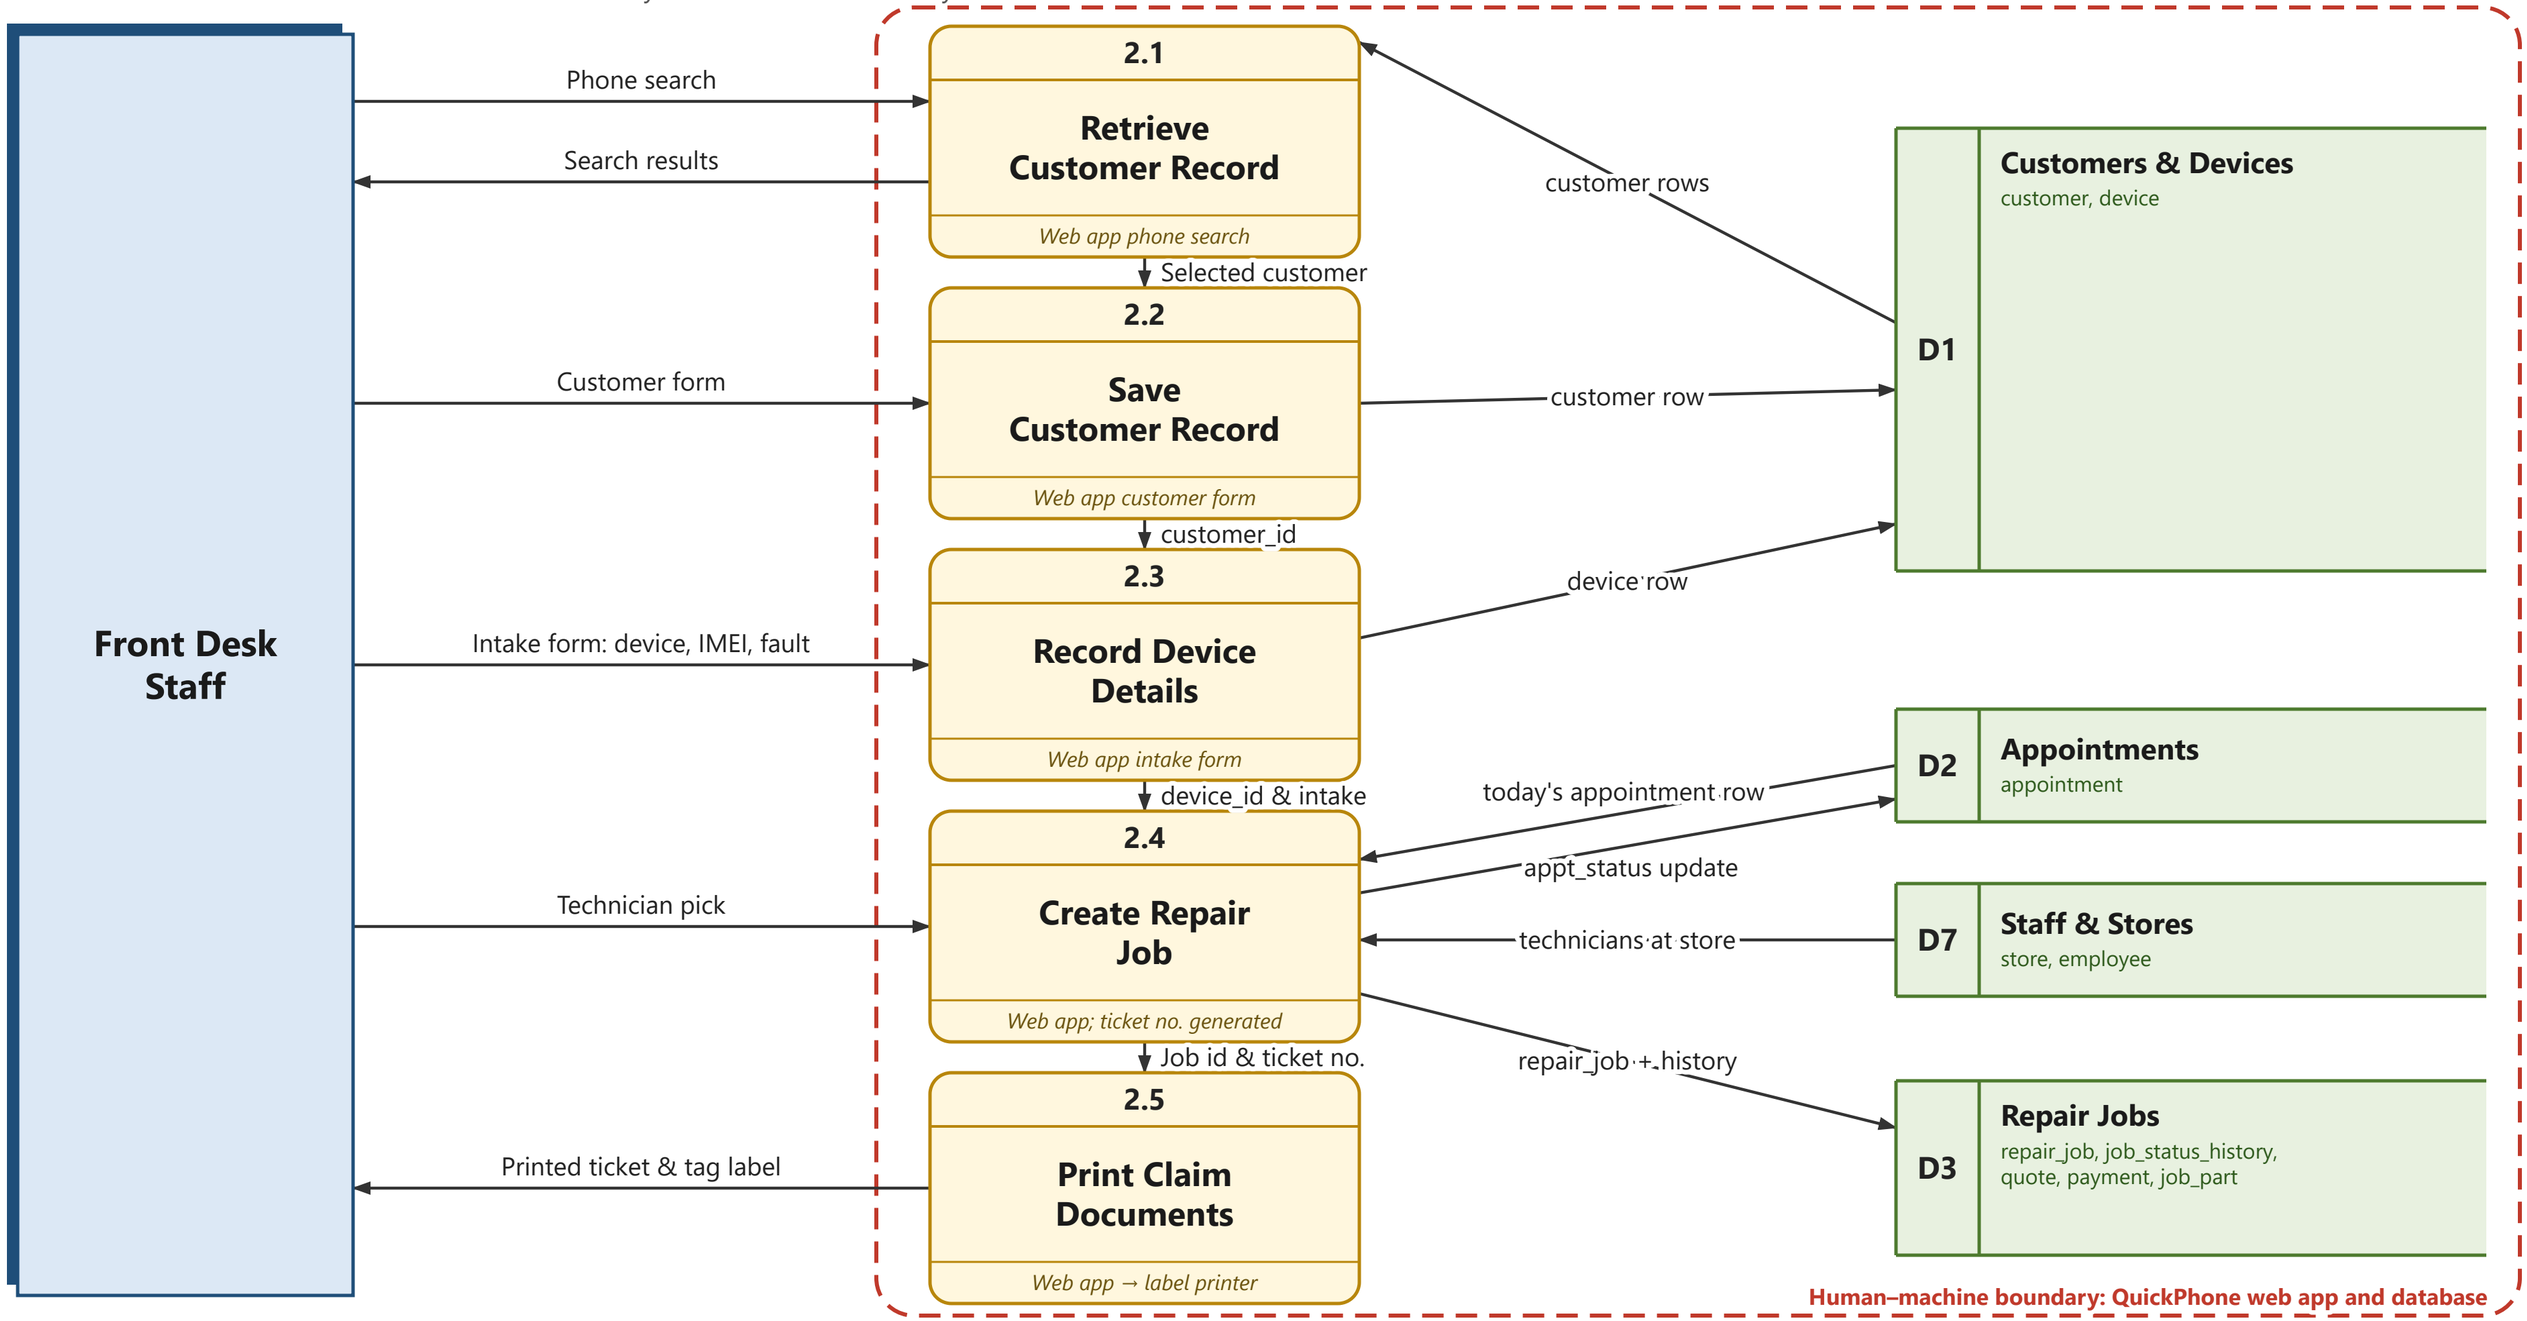

QuickPhone — Level 1 DFD: 1.0 Schedule Appointment (physical)

Optional appointment booking (FR01, UC-12). A walk-in needs no appointment; 2.0 pre-fills a job from one when it exists.

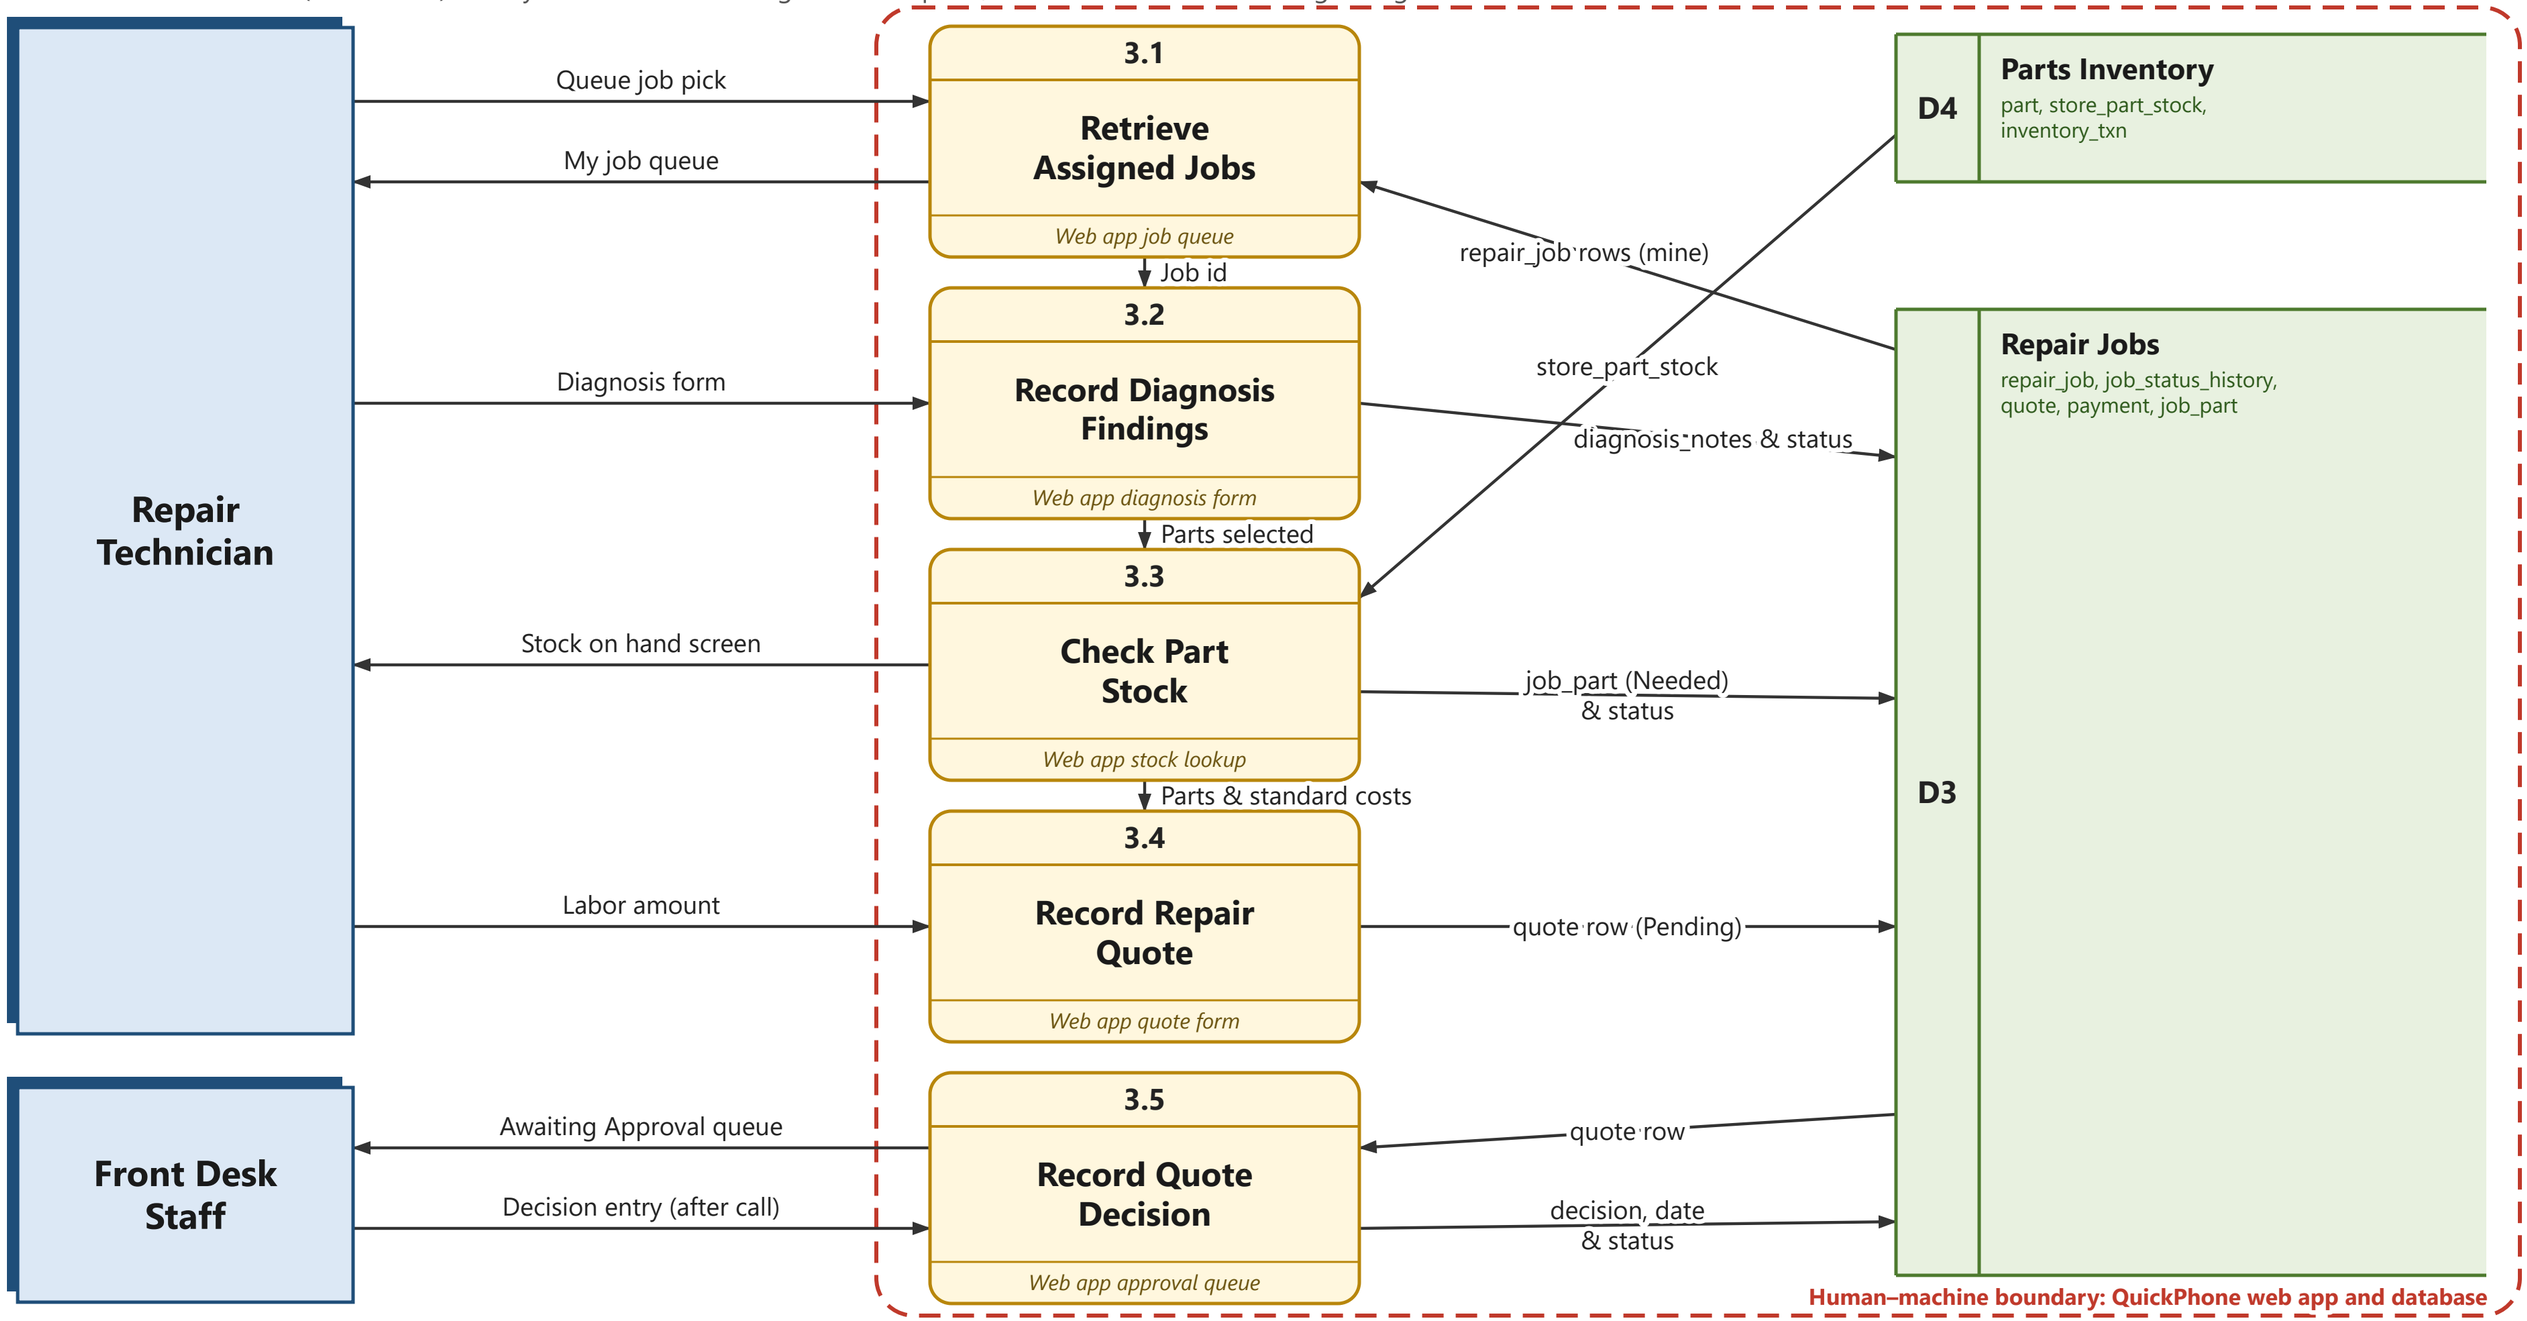

QuickPhone — Level 1 DFD: 2.0 Register Repair Job (physical)

From UC-01 Check In Device and FR02–FR04. "Identify Customer" is now two system actions: retrieve and save the customer record.

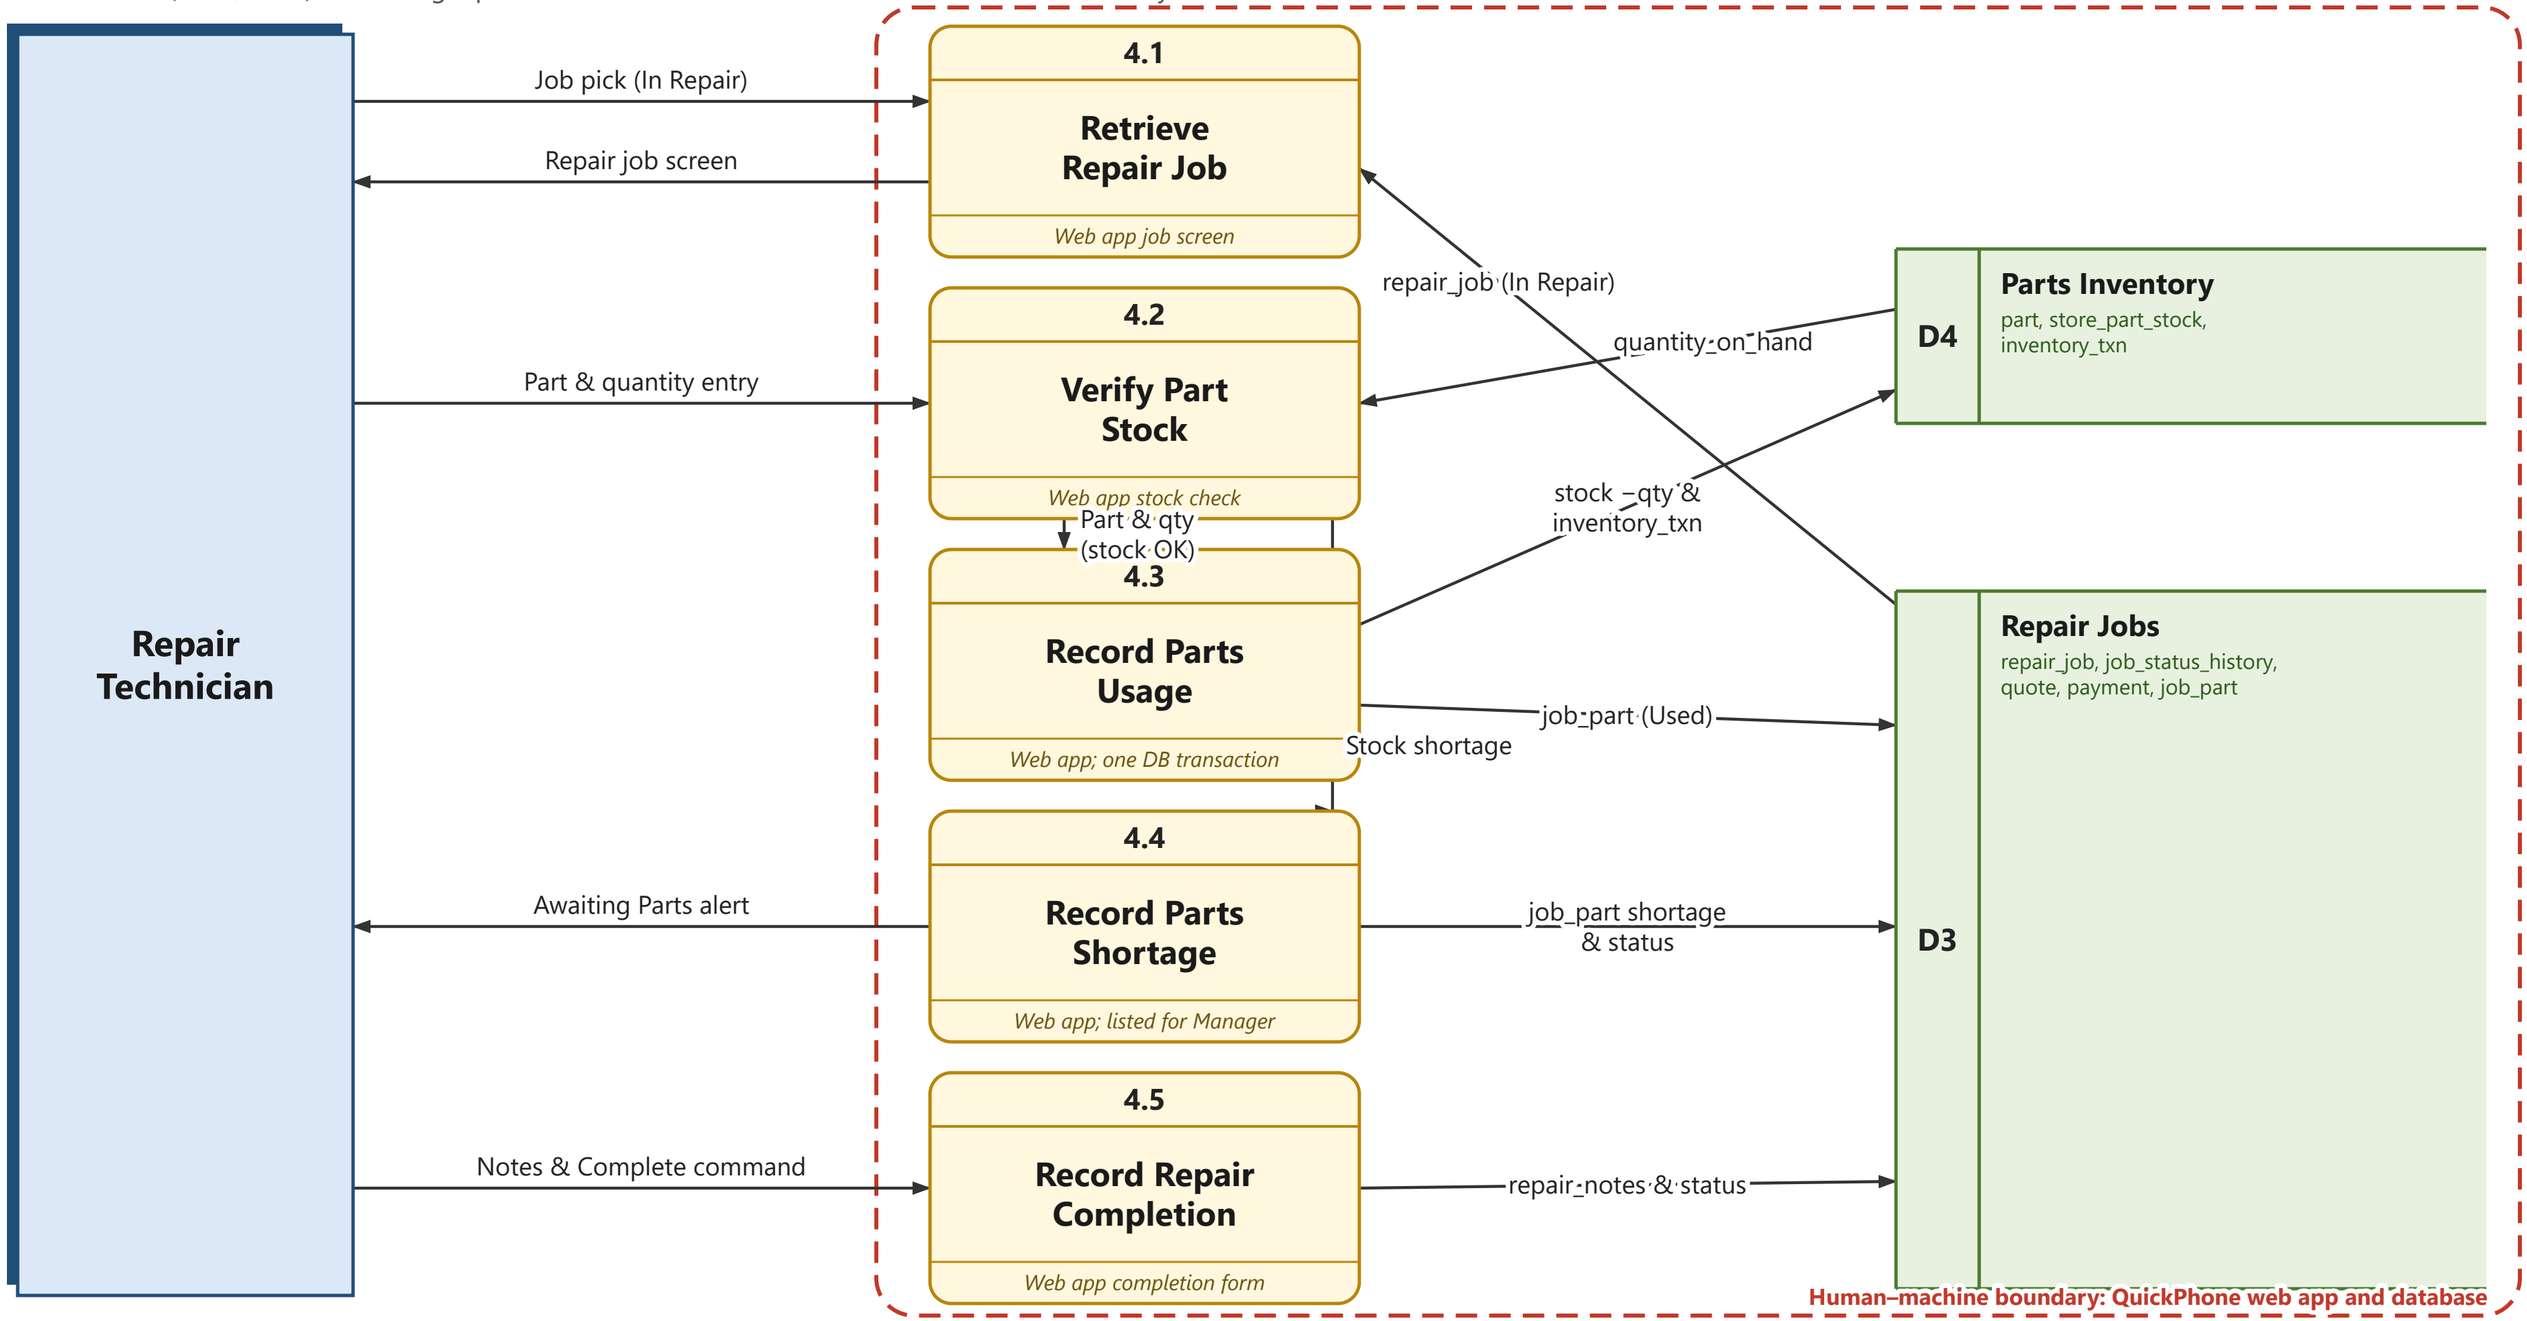

QuickPhone — Level 1 DFD: 3.0 Record Diagnosis (physical)

From UC-02 and UC-03 (FR05–FR07). The system records the diagnosis and quote; the technician does the diagnosing.

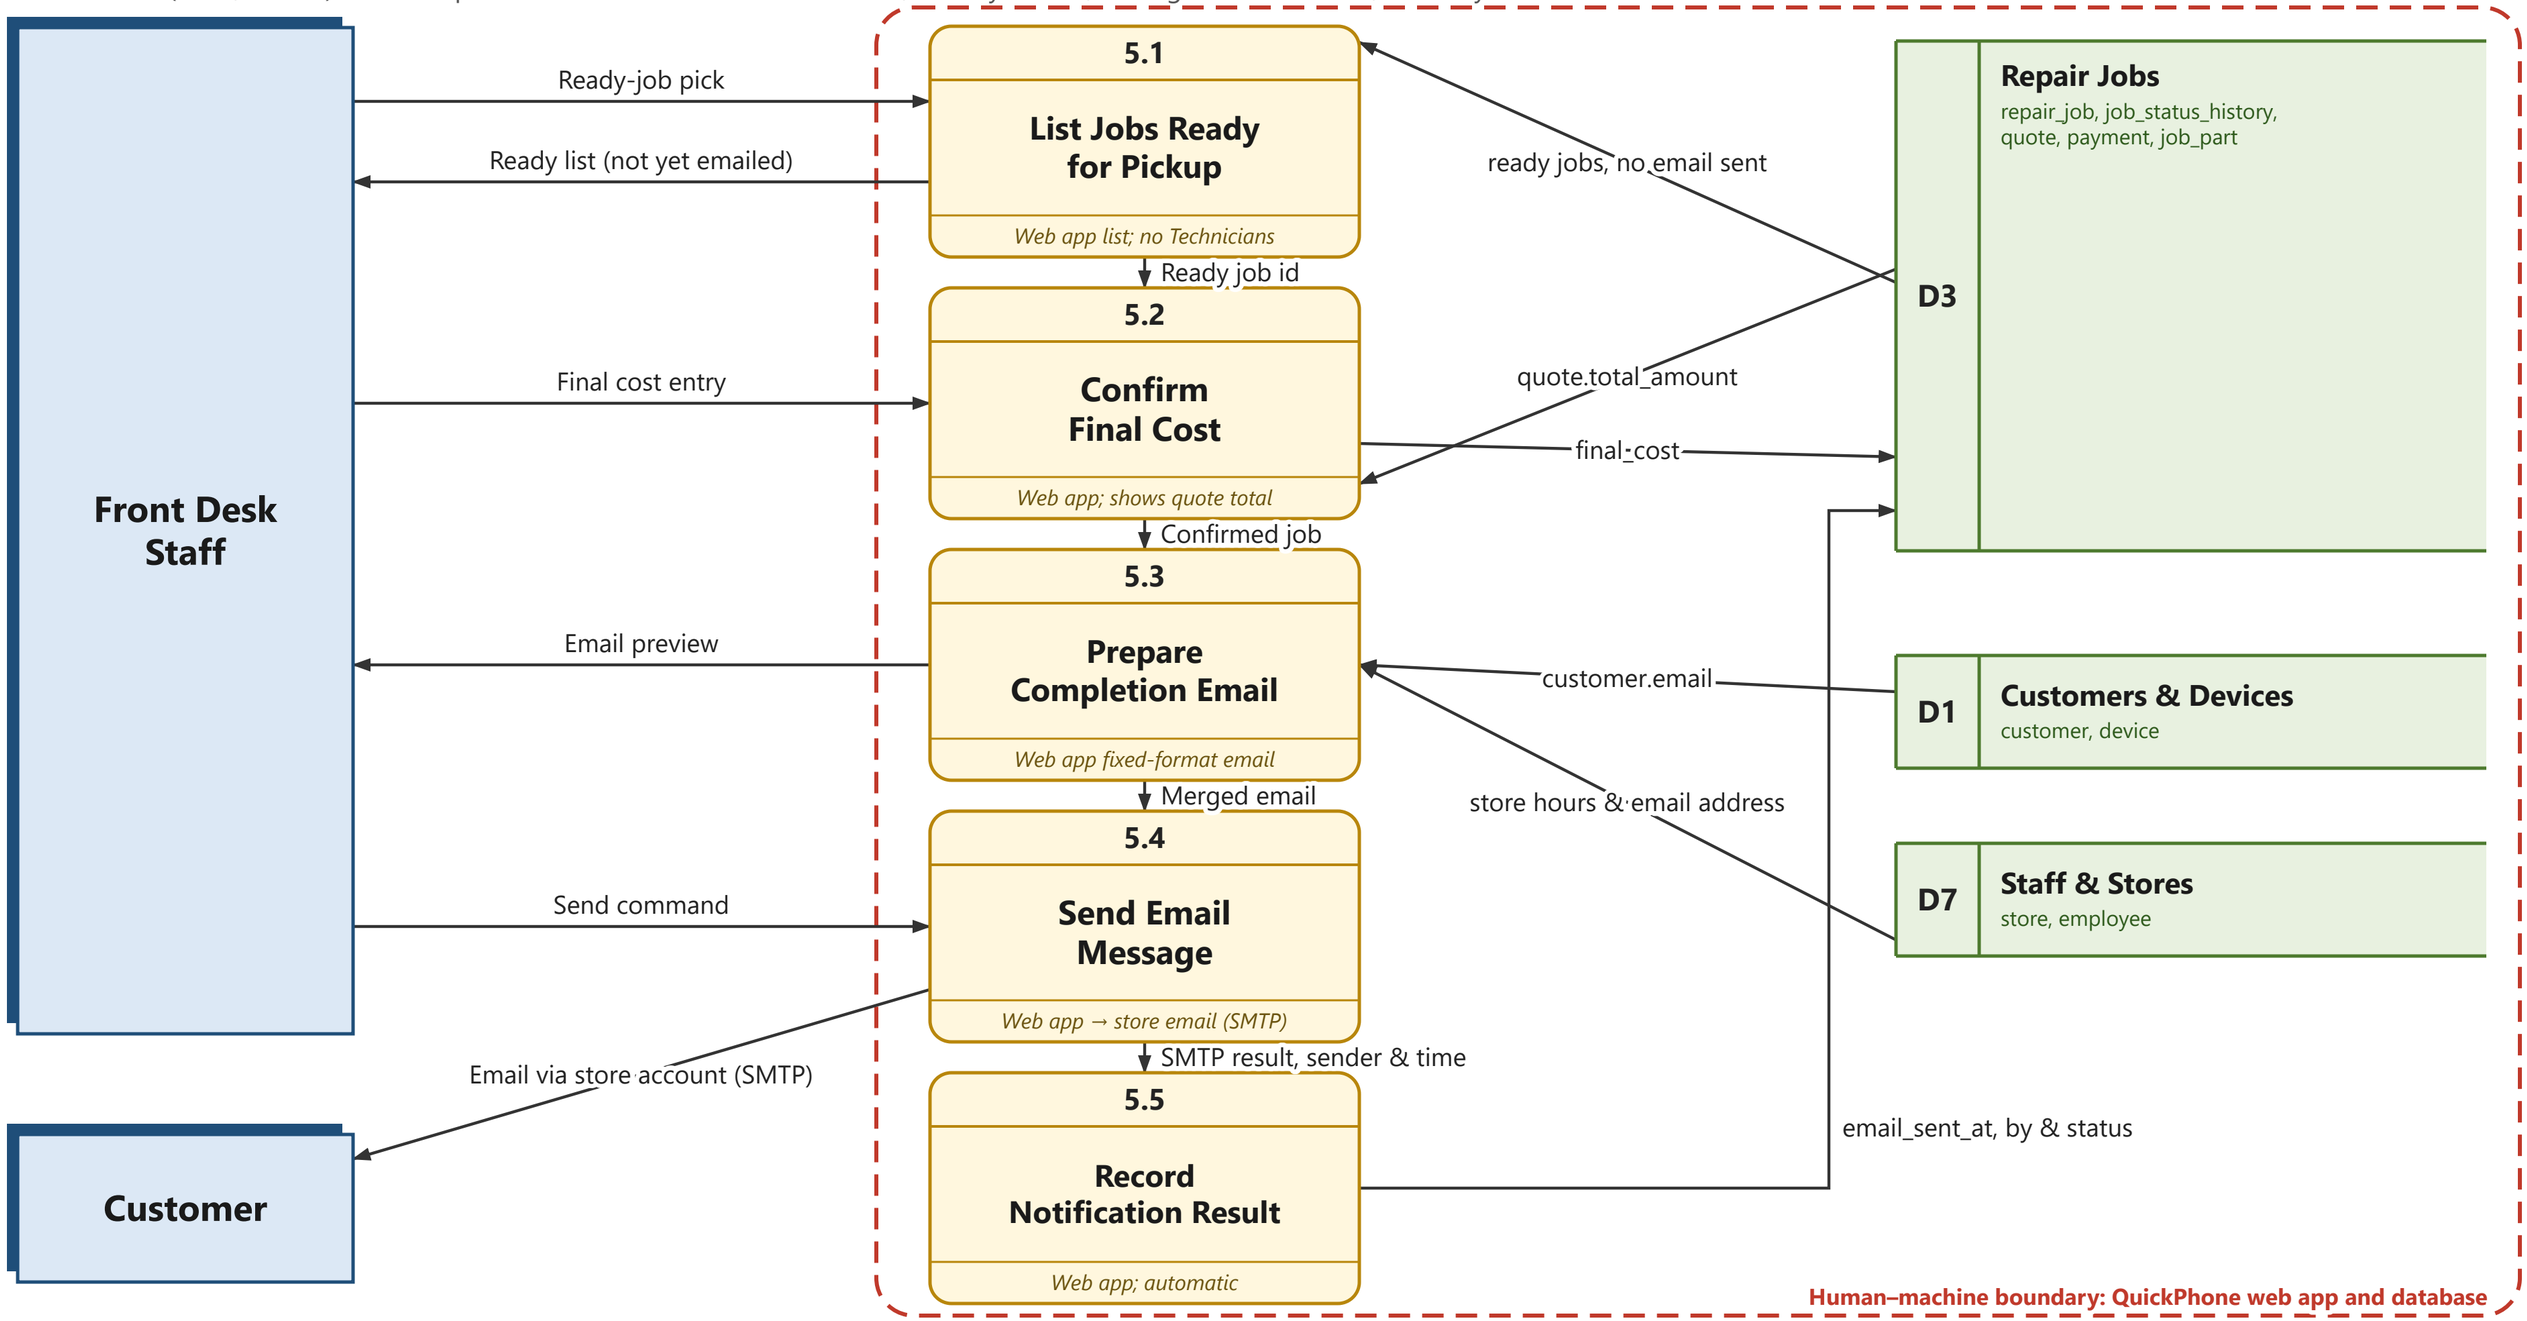

QuickPhone — Level 1 DFD: 4.0 Record Repair Work (physical)

From UC-04 (FR06, FR07). Recording a part as used deducts it from the store's stock automatically; there is no reservation.

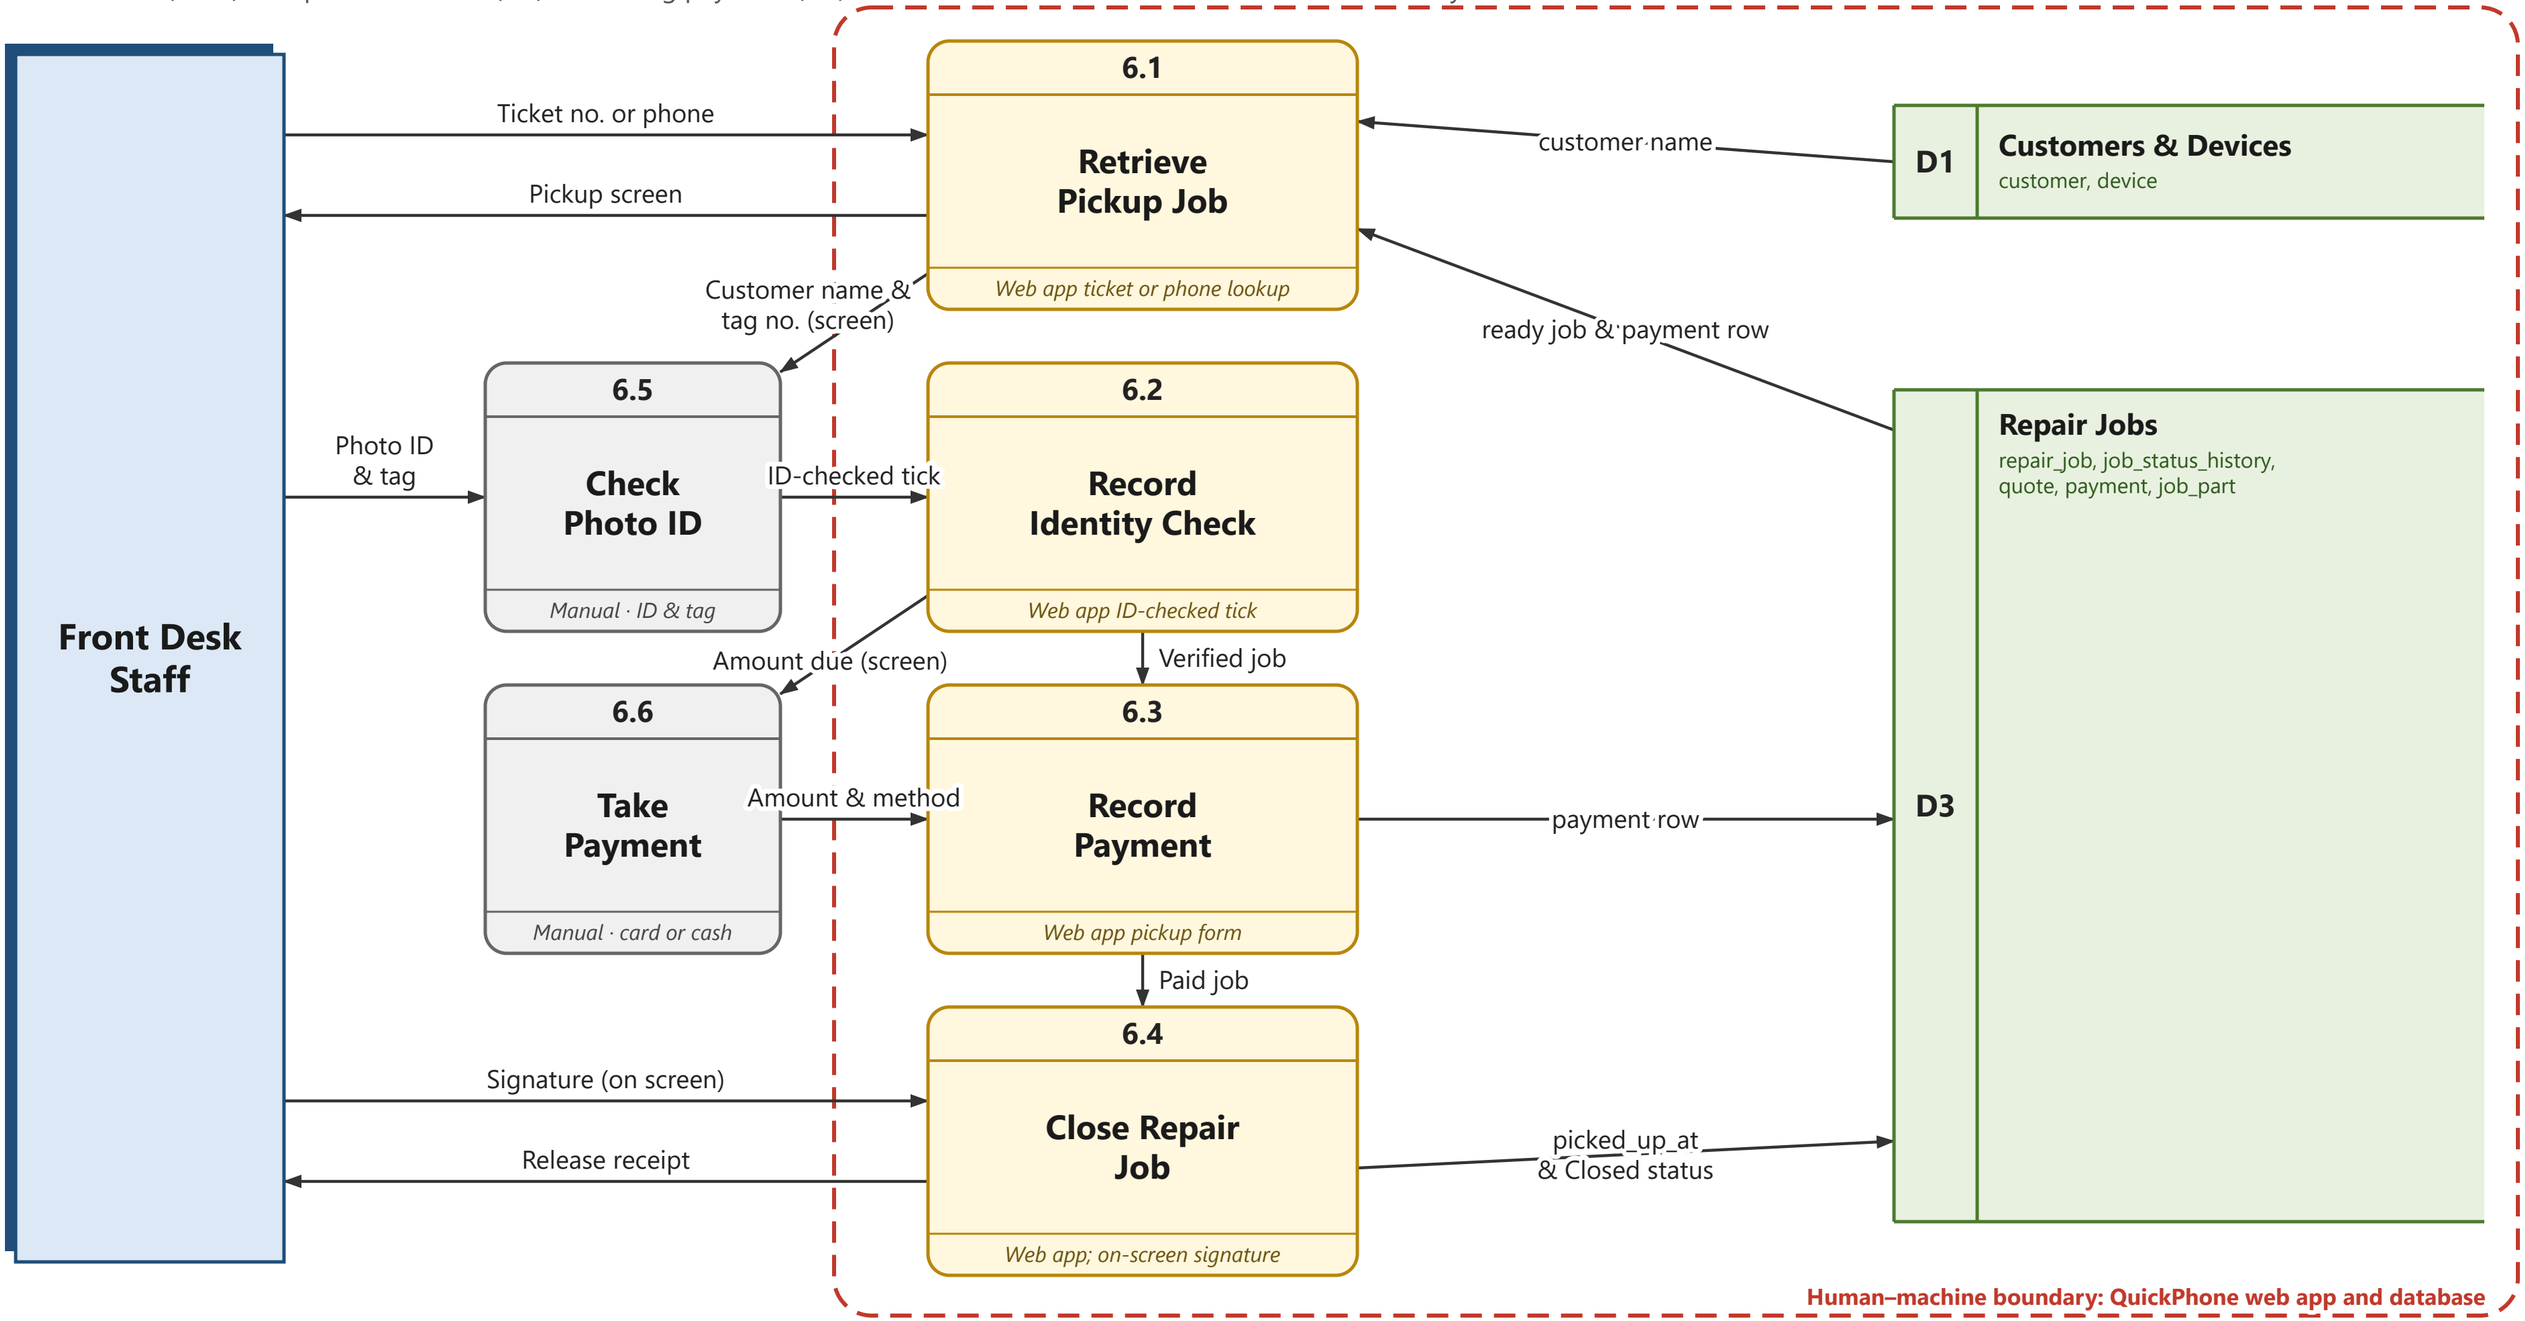

QuickPhone — Level 1 DFD: 5.0 Send Completion Notice (physical)

From UC-05 (FR12, NFR05). One completion email from the store's account, sent by Owner, Manager or Front Desk; never by a Technician.

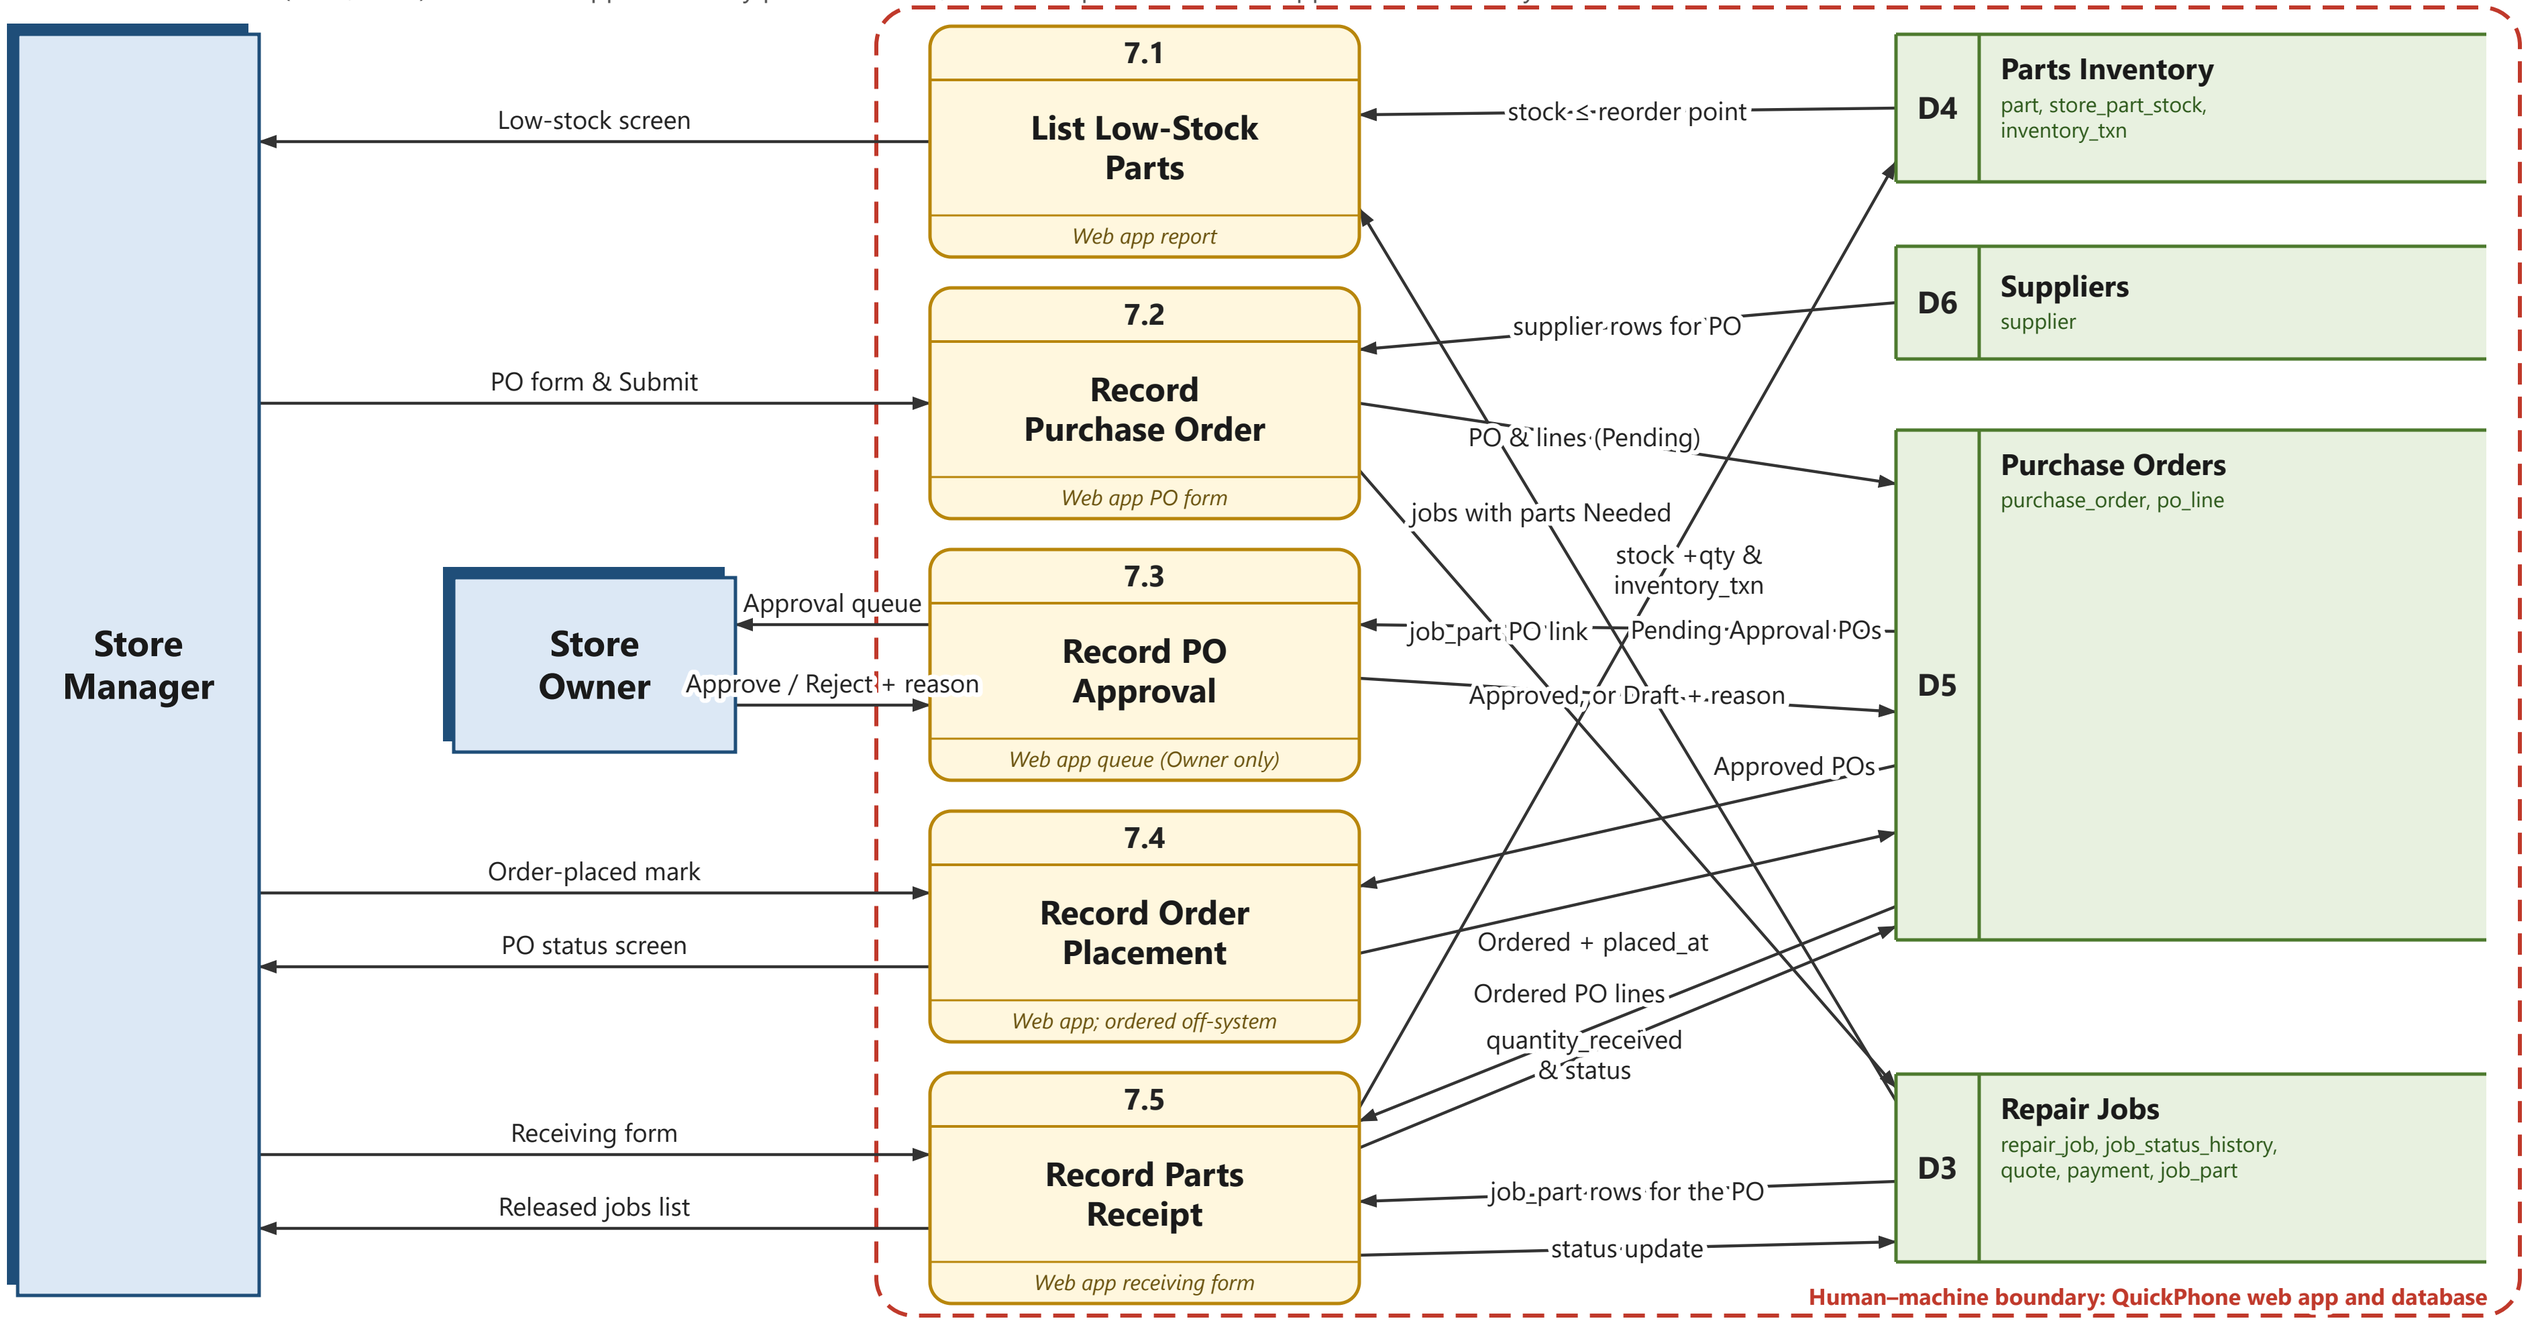

QuickPhone — Level 1 DFD: 6.0 Record Device Release (physical)

From UC-06 (FR08). The photo-ID check (6.5) and taking payment (6.6) are manual; the card machine is not linked to the system.

QuickPhone — Level 1 DFD: 7.0 Process Purchase Orders (physical)

From UC-08 to UC-10 (FR09, FR10). The Owner approves every purchase order; orders are placed with the supplier outside the system.

QuickPhone — Level 1 DFD: 9.0 Maintain Shop Records (physical)

From UC-07 and UC-11 (FR09, FR11, FR14). 9.5 adds the one-time CSV import of starting inventory as a batch process.
