QuickPhone — DFD and ERD alignment

Each DFD data store holds a fixed set of ERD entities; the grid shows which processes create, read and update each store.

Store	Name	ERD entities held (16 in all, each exactly once)	Created / updated by	Read by
D1	Customers & Devices	CUSTOMER, DEVICE	1.0, 2.0	1.0, 2.0, 5.0, 6.0, 8.0
D2	Appointments	APPOINTMENT	1.0, 2.0	1.0, 2.0
D3	Repair Jobs	REPAIR_JOB, JOB_STATUS_HISTORY, QUOTE, PAYMENT, JOB_PART	2.0, 3.0, 4.0, 5.0, 6.0, 7.0	3.0, 4.0, 5.0, 6.0, 7.0, 8.0
D4	Parts Inventory	PART, STORE_PART_STOCK, INVENTORY_TXN	4.0, 7.0, 9.0	3.0, 4.0, 7.0, 8.0, 9.0
D5	Purchase Orders	PURCHASE_ORDER, PO_LINE	7.0	7.0
D6	Suppliers	SUPPLIER	9.0	7.0, 9.0
D7	Staff & Stores	STORE, EMPLOYEE	9.0	1.0, 2.0, 5.0, 8.0, 9.0

Proc.	D1	D2	D3	D4	D5	D6	D7
1.0	CR	CRU					R
2.0	CRU	RU	C				R
3.0			CRU	R			
4.0			CRU	CRU			
5.0	R		RU				R
6.0	R		CRU				
7.0			RU	CRU	CRU	R	
8.0	R		R	R			R
9.0				CRU		CRU	CRU

Answers the Sprint 2 feedback: "The ERD contains well over twenty entities; the DFDs only show a small number of data stores."

16 entities, 7 stores: every ERD entity belongs to exactly one data store, and every store lists its entities on every DFD.

Removed or merged: ROLE and JOB_STATUS are now checked columns; NOTIFICATION and JOB_NOTE are columns on REPAIR_JOB; EMAIL_TEMPLATE, PO_JOB_LINK and backup_log were dropped.

Every store is maintained: each store is created by at least one process and read by at least one, so no store is a black hole or a miracle.
