QuickPhone — Level 1 DFD: Process 1.0 Schedule Appointment (logical)

New in Sprint 3 (instructor feedback): appointment scheduling is its own optional process. From FR01 and UC-12 Schedule Appointment.

Scope decision (Sprint 3): appointments are in scope and optional. A walk-in customer needs none; 2.0 Register Repair Job pre-fills from a booked appointment when one exists.

Balancing: the three Front Desk inputs make up the Level 0 flow "Appointment request or change"; the three outputs make up "Available times & confirmations".
