QuickPhone — Level 1 DFD: Process 4.0 Record Repair Work (logical)

From UC-04 Repair Device and Record Parts Used and FR07. Renamed from "Repair Device": the system records parts usage and completion.

Business rule (FR07, client-confirmed): recording a part as used deducts it from that store's stock automatically; there is no reservation step. Stock cannot go below zero.
4.5 is the only process that sets Ready for Pickup. A different or extra part that changes the price sets Awaiting Approval, and 3.5 records the decision again (UC-04 2a).
