QuickPhone — Level 1 DFD: Process 4.0 Record Repair Work (physical)

From UC-04 Repair Device and Record Parts Used and FR07. Renamed from "Repair Device": the system records parts usage and completion.

Business rule (FR07, client-confirmed): recording a part as used deducts it from that store's stock automatically; there is no reservation step. Stock cannot go below zero.
4.3 inserts job_part and inventory_txn and decrements store_part_stock in one transaction; a CHECK (quantity_on_hand ≥ 0) blocks negative stock and rolls back (UC-04 3a).
