# QuickPhone — Level 1 DFD: Process 6.0 Record Device Release (physical)

From UC-06 and FR08. The photo-ID check (6.5) and taking payment on the card machine or in cash (6.6) stay manual, outside the boundary.

The card machine is not connected (FR08): staff take payment (6.6), then key the amount and method into 6.3. 6.4 refuses to close a job with no payment row; there is no unpaid-release override.

The signature is saved as an image file referenced by repair_job.signature_file (open question: FR08).
