QuickPhone — Logical ERD detail 2 of 3: Repair jobs

D3 Repair Jobs: the job, its status history, quotes and their parts, payment and parts used. PK primary key · FK foreign key (→ table) · UK unique

Kept in 3NF: no derived attributes

Current status is the latest JOB_STATUS_HISTORY row and a quote total is LaborAmount + PartsAmount, so neither is stored here. The physical model stores both as documented denormalizations.
