QuickPhone — Physical ERD overview: 19 tables in 7 DFD data stores

Each shaded box is a DFD data store holding exactly these entities. Each line is named both ways: top or left from the "one" side, bottom or right back from the "many" side.

Not drawn: audit links to EMPLOYEE (FKs on the detail slides). Boxes on a container's top edge have no line: DEVICE_MODEL values are copied into DEVICE at check-in; SCREEN_ACCESS holds the Owner's per-role screen overrides.
